

STRATEGY & OPERATIONS

> ****Update 8 September 2026 — the real logo.**** The founder supplied the Vytalix logo: a heart outline whose right-hand stroke becomes a circuit trace ending in a node, the wordmark "Vytalix" and the strapline "Technology for Life", in a single deep blue sampled at ****#153892****. The palette below is updated accordingly: ****Vytalix Blue #153892**** replaces "Vytal Teal" as the primary colour; Deep becomes #0F2354; Mist becomes #E9EDF8; the dark-surface highlight becomes #9DB8FF. Ember remains the single

warm accent (≤5% of any surface).

Do not redraw or recolour the logo; use the mark alone only below 120 px wide. Clear space = the height of the "V" on all sides.

Document 03 · Brand & Web · Version 0.1 (draft) · 7 September 2026

Status: PROPOSED. Consistent with [/FACTS_BASE.md](#). Nothing in this document is a claim of achievement; it is the system we will build to.

Language rules apply to every asset produced from this system. No claimed clients, partners, NHS approval, clinical outcomes, testimonials, named team members, offices, phone numbers or awards until each is true and documented. MaternaLink is always "MaternaLink (in development)".

0. Naming note (read before spending money on assets)

- Trading name in this system: **Vytalix**, tagline **Technology for Life**. (FACTS_BASE A1)
- The repository spelling "Vitalyx" is treated as a typo.
- Clearance risk is real: VITALIX LTD (two UK companies), VITALX LTD, VYTAL(UK) LIMITED, Vytalyx Inc. (US health-tech) and Vytalize Health (US) all exist. **TO VALIDATE:** Companies House name check, UK IPO trade-mark search (Class 9, 35, 41, 42, 44), domain availability. Do not commission signage, printed stationery or a registered trade mark until cleared.
- Everything below is designed so that a name change would cost one find-and-replace and a new wordmark, not a re-brand: the symbol, palette, type and voice are independent of the letters.

1. Positioning

Category: A UK health-technology group that combines advisory, consulting, product development and learning under one brand.

Positioning statement (internal):

For health organisations, founders and public bodies that need technology to work in real care settings, Vytalix is a health-technology group that brings strategic advice, hands-on delivery, product development and learning together — because the gap between a good idea and a safe, adopted product is closed by people who can do all four.

What makes it distinct (true today):

- Four connected pillars rather than a single consultancy or a single product. Advice informs delivery; delivery informs product; product informs learning.

Vytalix · > **Update 8 September 2026 — the real logo.** The founder supplied the Vytalix logo: a heart outline whose right-hand stroke becomes Technologya circuit trace ending in a node, the wordmark "Vytalix" and the strapline "Technology for Life", in a single deep blue sampled at for Life **#153892**. The palette below is updated accordingly: **Vytalix Blue #153892** replaces "Vytal Teal" as the primary colour; Deep becomes #0F2354; Mist becomes #E9EDF8; the dark-surface highlight becomes #9DB8FF. Ember remains the single warm accent (≤5% of any surface). Logo files: `website/assets/img/vytalix-logo.png` (full lock-up, transparent) and `vytalix-mark.png` (heart mark). Do not redraw or recolour the logo; use the mark alone only below 120 px wide. Clear space = the height of the "V" on all sides.

- Founder-led, pre-formation, honest about stage. Our credibility comes from rigour and candour, not from a claimed track record.
- An explicit safety posture: MaternaLink v1 is positioned as non-diagnostic care-coordination and monitoring-support, with clinical AI held as a research track until validated (FACTS_BASE A4).
- A dual focus: UK home market, with active interest in maternal health in Nigeria and one further African market (FACTS_BASE A2).

Positioning we must NOT adopt: "the AI that predicts maternal complications", "NHS partner", "award-winning", "trusted by".

2. Brand promise

Technology that earns its place in care.

Everything we advise on, build or teach must be safe, adoptable and worth the attention of the people who use it.

3. Brand personality

Trait	What it looks like	What it never looks like
Intelligent	Precise language, evidence cited, trade-offs named	Jargon, buzzwords, unsupported superlatives
Human	Writes to a person; acknowledges the clinician, the mother, the manager	Stock photos of smiling doctors; "users" as an abstraction
Technological	Confident about systems, data, standards, engineering	Circuit-board clichés, glowing brains, "AI-powered everything"
Trustworthy	Says what it is and isn't; marks drafts as drafts	Overclaiming; vague "partners"
Premium	Restraint, whitespace, typographic care	Cheap templates, clip art, gradient sludge
Innovative	New combinations of proven things; thoughtful roadmap	Novelty for its own sake
Impact-driven	Names the problem (e.g. maternal inequity) plainly, commits to measuring	Charity-style pity imagery; virtue signalling

4. Tone of voice

Principles: clear before clever; specific before broad; honest about stage; warm but not chatty; British English.

Do / Don't

Do	Don't
"MaternaLink is in development. It is designed to support care coordination; it is not a diagnostic tool."	"MaternaLink predicts and prevents maternal complications."
"We are founder-led and pre-seed. Here is exactly what we can do for you today."	"Trusted by leading NHS trusts."
"We'll tell you if your idea should not be built."	"We turn every vision into reality."
"Accreditation is being explored; our courses are not yet accredited."	"CPD-certified courses."
"Register interest — we'll publish roles when we can fund them."	"Join our fast-growing team!"
"Built with clinicians" — only once a clinician has actually co-designed it.	Claiming co-design before it happens.

Vytalix · > **Update 8 September 2026 — the real logo.** The founder supplied the Vytalix logo: a heart outline whose right-hand stroke becomes Technologya circuit trace ending in a node, the wordmark "Vytalix" and the strapline "Technology for Life", in a single deep blue sampled at for Life **#153892**. The palette below is updated accordingly: **Vytalix Blue #153892** replaces "Vytal Teal" as the primary colour; Deep becomes #0F2354; Mist becomes #E9EDF8; the dark-surface highlight becomes #9DB8FF. Ember remains the single warm accent (≤5% of any surface). Logo files: `website/assets/img/vytalix-logo.png` (full lock-up, transparent) and `vytalix-mark.png` (heart mark). Do not redraw or recolour the logo; use the mark alone only below 120 px wide. Clear space = the height of the "V" on all sides.

Micro-rules

- Sentences under 25 words where possible. One idea per paragraph.
- Use "we" and "you". Avoid "the company" and passive constructions.
- Numbers: cite the source or don't use the number. The MBRRACE-UK disparity statistic may be used only with the current report cited (FACTS_BASE \$1).
- Never write "revolutionary", "cutting-edge", "world-class", "seamless", "leverage" (verb), "solutions" as a filler noun (Health Solutions is a pillar name and is fine).
- Mark placeholders in square brackets: [Registered office address – add after incorporation].

5. Messaging hierarchy

Master message

Vytalix — Technology for Life. A UK health-technology group that advises, builds, delivers and teaches, so that technology earns its place in care.

Pillar messages

Pillar	Message	Proof points that are TRUE today	Proof points to unlock (say only when true)
Vytalix Advisory	Independent, senior advice on health-technology strategy, market entry, regulation and funding readiness.	Founder-led; independent (no vendor commissions); pre-seed and candid about it; UK-domiciled	"Advised N organisations"; named advisers
Vytalix Consulting	Hands-on delivery: discovery, service design, product and data work, implementation support.	Fixed-scope packages with defined deliverables; documented methods (this repository)	Case studies; client logos
Vytalix Health Solutions	Products designed for real care settings, starting with MaternaLink (in development).	An early prototype exists; a safety-first, non-diagnostic v1 scope; a published roadmap with validation gates	"Built with clinicians"; pilot sites; ethics approval; clinical validation; regulatory status
Vytalix E-Learning	Practical learning for health teams and founders on digital health, data and safe AI.	Curriculum themes defined; formats defined	Accreditation; learner numbers; corporate clients

Supporting message on impact: Our first product focus is maternal health, where outcomes are unequal and coordination fails too often. We aim to help teams coordinate care better — and we will measure whether we do.

6. Taglines

1. **Technology for Life** — the founder's line; broad, humane, ownable with consistent use.
2. Technology that earns its place in care.
3. Built for care, not for demos.
4. Advice. Delivery. Product. Learning. One group.
5. Health technology, done properly.
6. From good idea to safe, adopted product.
7. Where care meets code.

Vytalix · > **Update 8 September 2026 — the real logo.** The founder supplied the Vytalix logo: a heart outline whose right-hand stroke becomes Technologya circuit trace ending in a node, the wordmark "Vytalix" and the strapline "Technology for Life", in a single deep blue sampled at for Life **153892**. The palette below is updated accordingly: **Vytalix Blue #153892** replaces "Vytal Teal" as the primary colour; Deep becomes #0F2354; Mist becomes #E9EDF8; the dark-surface highlight becomes #9DB8FF. Ember remains the single warm accent (≤5% of any surface). Logo files: `website/assets/img/vytalix-logo.png` (full lock-up, transparent) and `vytalix-mark.png` (heart mark). Do not redraw or recolour the logo; use the mark alone only below 120 px wide. Clear space = the height of the "V" on all sides.

- 8. Serious about health. Serious about technology.
- 9. Technology with a duty of care.
- 10. Made for the people who make care work.

Recommendation: Keep **"Technology for Life"** as the master tagline (it is already the brief and it is vision-scale). Use **"Technology that earns its place in care"** as the descriptive sub-line in web hero, decks and proposals where "Technology for Life" alone is too abstract. Retire the others or use as section headings.

TO VALIDATE: "Technology for Life" is a common phrase; check for conflicting trade-mark use in Class 42/44 before registering.

7. Colour palette

Warm neutrals + deep teal + a single warm accent. Deliberately not "hospital blue".

Token	Name	Hex	Role
--ink	Ink	#0F2233	Primary text; dark surfaces
--deep	Deep	#0F2354	Secondary dark surface, hero panels
--teal (token name kept for CSS stability)	Vytalix Blue	#153892	Primary brand colour from the logo; links; primary buttons
--teal-dark	Blue Dark	#0E2A70	Hover/active states
--ember	Ember	#BF3E27	Single accent: the Y-node, key CTAs, emphasis. Use sparingly (≤5% of any surface).
--mint	Signal Blue	#9DB8FF	Highlights on dark surfaces; illustration accent. Never as text on light.
--bone	Bone	#F7F4EE	Page background
--paper	Paper	#FFFFFF	Cards, forms
--mist	Mist	#E9EDF8	Tinted section backgrounds
--slate	Slate	#46545F	Secondary text
--line	Line	#D9D4CA	Borders, dividers
--night	Night	#0A1A26	Dark-theme background
--night-2	Night 2	#12283A	Dark-theme card
--night-text	Night Text	#E9EEF1	Dark-theme body text
--night-muted	Night Muted	#A9B8C2	Dark-theme secondary text
--ember-light	Ember Light	#F4A88F	Dark-theme accent text

Contrast ratios (WCAG 2.1; AA needs 4.5:1 normal text, 3:1 large text/UI) — computed, not estimated:

Foreground on background	Ratio	Result
Ink on Paper	16.19	AAA

Vytalix · > **Update 8 September 2026 — the real logo.** The founder supplied the Vytalix logo: a heart outline whose right-hand stroke becomes Technologya circuit trace ending in a node, the wordmark "Vytalix" and the strapline "Technology for Life", in a single deep blue sampled at for Life **#153892**. The palette below is updated accordingly: **Vytalix Blue #153892** replaces "Vytal Teal" as the primary colour; Deep becomes #0F2354; Mist becomes #E9EDF8; the dark-surface highlight becomes #9DB8FF. Ember remains the single warm accent (≤5% of any surface). Logo files: `website/assets/img/vytalix-logo.png` (full lock-up, transparent) and `vytalix-mark.png` (heart mark). Do not redraw or recolour the logo: use the mark alone only below 120 px wide. Clear space = the height of the "V" on all sides.

Foreground on background	Ratio	Result
Ink on Bone	14.75	AAA
Ink on Mist	14.04	AAA
Slate on Paper	7.80	AAA
Slate on Bone	7.10	AAA
Vytal Teal on Paper	6.00	AA (AAA large)
Vytal Teal on Bone	5.47	AA
Vytal Teal on Mist	5.20	AA
Paper on Vytal Teal (buttons)	6.00	AA
Paper on Teal Dark	8.42	AAA
Ember on Paper	5.34	AA
Ember on Bone	4.86	AA
Paper on Ember (accent buttons)	5.34	AA
Paper on Deep	12.00	AAA
Signal Mint on Night	11.23	AAA
Signal Mint on Deep	7.63	AAA
Night Text on Night	15.11	AAA
Night Muted on Night	8.68	AAA
Night Text on Night 2	12.92	AAA
Ember Light on Night	9.12	AAA

Rules: Signal Mint is never body text on a light surface (fails). Ember is never used for large fills behind long text. Gradients are limited to the illustration layer (Deep → Teal, Night → Deep), never behind body copy.

8. Typography

Pairing (Google Fonts): **Fraunces** (display/headings — a warm, contemporary serif with optical sizes; reads premium and human, avoids the SaaS-sans sameness) + **Manrope** (body/UI — geometric, highly legible, technical without coldness).

```
--font-display: "Fraunces", "Iowan Old Style", "Palatino Linotype", Georgia, serif;
--font-body: "Manrope", "Inter", system-ui, -apple-system, "Segoe UI", Roboto, sans-serif;
--font-mono: "JetBrains Mono", ui-monospace, SFMono-Regular, Menlo, Consolas, monospace; /*
not loaded; system fallback */
```

Scale (web, fluid): base 17px/1.6; h1 clamp(2.4rem, 5vw, 4rem) weight 500, letter-spacing −0.02em, line-height 1.05; h2 clamp(1.8rem, 3.2vw, 2.6rem); h3 1.35rem (Manrope 700); eyebrow 0.8rem uppercase tracking 0.12em (Manrope 700, teal).

Vytalix · > ****Update 8 September 2026 — the real logo.**** The founder supplied the Vytalix logo: a heart outline whose right-hand stroke becomes Technologya circuit trace ending in a node, the wordmark "Vytalix" and the strapline "Technology for Life", in a single deep blue sampled at for Life ****#153892****. The palette below is updated accordingly: ****Vytalix Blue #153892**** replaces "Vytal Teal" as the primary colour; Deep becomes #0F2354; Mist becomes #E9EDF8; the dark-surface highlight becomes #9DB8FF. Ember remains the single warm accent (≤5% of any surface). Logo files: `website/assets/img/vytalix-logo.png` (full lock-up, transparent) and `vytalix-mark.png` (heart mark). Do not redraw or recolour the logo; use the mark alone only below 120 px wide. Clear space = the height of the "V" on all sides.

Fraunces is loaded with the `SOFT` axis at a low value and `opsz auto` so it stays crisp, not decorative. Weights loaded: Fraunces 400/500/600; Manrope 400/500/700. Load with `font-display: swap` and `preconnect`.

Print/deck equivalents when fonts cannot be embedded: Georgia + Arial.

9. Logo

Wordmark concept — "the monoline mark": VYTALIX set in a custom geometric monoline (every letter built from straight strokes, round caps, uniform weight). The letters V, Y, T, A, L, I, X are all straight-line forms, which makes a bespoke, fully-outlined wordmark possible without any font dependency — it renders identically everywhere and can be cut, embroidered or engraved.

Symbol concept — "the Y-node": the Y in VYTALIX is the symbol. Its three strokes stand for the three things Vytalix brings together — people, care and data (or advice, delivery and product). Where the strokes meet, a small filled circle in Ember marks the point of convergence: the moment technology becomes useful in a life. The Y-node is extracted as the standalone mark for favicons, app icons and social avatars, placed inside a rounded square in Deep with the strokes in Bone and the node in Ember.

Files: `website/assets/img/logo.svg` (primary wordmark, positive), `logo-mono.svg` (single colour), `logo-reverse.svg` (for dark surfaces), `mark.svg` (Y-node symbol), `favicon.svg`.

Rules: minimum width 120px / 30mm for the wordmark, 24px for the mark; clear space = height of the letter X on every side; never stretch, recolour outside the palette, add drop shadows or place on photography without a solid panel. Do not typeset the name in Fraunces or Manrope as a substitute for the wordmark; in running text write "Vytalix" (title case).

10. Iconography

- Style: 1.75px monoline, round caps and joins, 24px grid, minimal interior detail — matching the wordmark's construction.
- Concept set: Advisory (compass), Consulting (spanner-and-path), Health Solutions (Y-node in a shield outline, meaning "safeguarded"), E-Learning (open book with a signal line), Pilot (flag), Data (three nodes), Safety (shield), Roadmap (waypoints).
- Icons are always paired with a text label; never decorative-only in navigation.
- Source: hand-drawn inline SVG in the website; a Figma library is a TO DO.

11. Illustration and photography direction

Illustration (primary visual layer): abstract "confluence" compositions — flowing monoline paths converging to nodes on Deep/Night panels with Signal Mint and Ember accents; soft topographic contour fields on Bone. They express coordination, signal and care without depicting bodies, organs or devices. All current site illustrations are SVG and stock-free.

Photography (when budget allows; none used today):

- Real environments, real light, real people at work — corridors, community clinics, kitchen-table meetings, a midwife's bag, a laptop on a ward desk. Documentary, not posed.
- Diverse by default, particularly in maternal contexts, and always with consent and model releases.
- No white-coat-and-stethoscope stock, no glowing-brain AI, no hands-on-belly clichés.

Vytalix · > **Update 8 September 2026 — the real logo.** The founder supplied the Vytalix logo: a heart outline whose right-hand stroke becomes Technologya circuit trace ending in a node, the wordmark "Vytalix" and the strapline "Technology for Life", in a single deep blue sampled at for Life **#153892**. The palette below is updated accordingly: **Vytalix Blue #153892** replaces "Vytal Teal" as the primary colour; Deep becomes #0F2354; Mist becomes #E9EDF8; the dark-surface highlight becomes #9DB8FF. Ember remains the single warm accent (≤5% of any surface). Logo files: `website/assets/img/vytalix-logo.png` (full lock-up, transparent) and `vytalix-mark.png` (heart mark). Do not redraw or recolour the logo; use the mark alone only below 120 px wide. Clear space = the height of the "V" on all sides.

- Colour grade: warm neutrals, slight desaturation; never blue-tinted.
- Until real photography is commissioned, use illustration. Never use stock photography that implies a clinical partnership we do not have.

12. UI design principles

1. **Say what it is.** Every product surface states its stage and scope (e.g. "In development — non-diagnostic").
2. **One accent, used for meaning.** Ember marks the action or the node, nothing else.
3. **Generous rhythm.** 8px spacing scale; section padding 96–128px on desktop; max line length 65–72ch.
4. **Accessible by construction.** Semantic landmarks, skip link, visible focus (2px Ember ring with 2px offset), 4.5:1 contrast, reduced-motion respected, 44px touch targets.
5. **Fast by default.** No frameworks, no third-party scripts except Google Fonts; SVG only; total page weight under 300KB before fonts.
6. **Cards are for choices, not decoration.** Cards only where the user picks between siblings (pillars, packages).
7. **Dark theme is a treatment, not a second brand.** Same tokens, inverted surfaces; Ember Light and Signal Mint carry accent duties.
8. **Forms are honest.** Tell people where the data goes and what happens next.

13. Presentation design system

- **Format:** 16:9, 1920×1080. Margins 96px. 12-column grid with 24px gutters; content area 1728px.
- **Title slide:** Deep background, wordmark reverse top-left, Fraunces 500 title 72px in Bone, subtitle Manrope 28px in Signal Mint, footer line with date and "Confidential — draft" in Night Muted.
- **Section divider:** Night background, confluence illustration right two-thirds, section number in Ember 24px, title 56px.
- **Body slide:** Bone background; eyebrow (Manrope 700, 18px, uppercase, Teal); title Fraunces 44px Ink; body Manrope 24px/1.4 Slate, max 2 columns; footer: slide number left, "Vytalix — Technology for Life" centre, status tag right.
- **Data slide:** one chart per slide; Teal primary series, Slate secondary, Ember for the one point that matters; source line in 16px under the chart.
- **Rules:** no more than 6 bullets; no clip art; every number has a source or a label of ESTIMATE/ASSUMPTION; roadmap slides show validation gates explicitly.
- Fonts embedded; fallback Georgia/Arial.

14. Document design

Letterhead (A4):

- Header: wordmark top-left at 34mm width; right-aligned block in Manrope 8pt Slate: [Registered office address — add after incorporation], [Company number — add after incorporation], hello@[domain — TO VALIDATE].
- Body: Manrope 10.5pt/1.5 Ink, margins 25mm left/right, 30mm top, 25mm bottom. Headings Fraunces 16pt.
- Footer: 8pt Slate: "Vytalix is a trading name of [Legal entity name — TO VALIDATE], registered in England & Wales, no. [●]. Registered office: [●]." Page numbers right.

Vytalix · > ****Update 8 September 2026 — the real logo.**** The founder supplied the Vytalix logo: a heart outline whose right-hand stroke becomes Technologya circuit trace ending in a node, the wordmark "Vytalix" and the strapline "Technology for Life", in a single deep blue sampled at for Life ****#153892****. The palette below is updated accordingly: ****Vytalix Blue #153892**** replaces "Vytal Teal" as the primary colour; Deep becomes #0F2354; Mist becomes #E9EDF8; the dark-surface highlight becomes #9DB8FF. Ember remains the single warm accent (≤5% of any surface). Logo files: `website/assets/img/vytalix-logo.png` (full lock-up, transparent) and `vytalix-mark.png` (heart mark). Do not redraw or recolour the logo; use the mark alone only below 120 px wide. Clear space = the height of the "V" on all sides.

Proposal template structure:

- 1. Cover — client name, engagement title, date, version, "Proposal — confidential".
- 2. Summary on one page — the problem, what we propose, outcome, price, timing.
- 3. Context and objectives (what you told us).
- 4. Our approach (phases, methods, what we will *not* do).
- 5. Deliverables (table: deliverable, format, acceptance criterion).
- 6. Team and roles (founder-led; named associates only with consent; no invented people).
- 7. Timeline (Gantt-style table).
- 8. Commercials (fixed fee or day rate; payment schedule; expenses; VAT status TO VALIDATE).
- 9. Assumptions, dependencies and risks.
- 10. Terms (reference to Terms of Business; IP; confidentiality; data protection).
- 11. Next steps and signature block.

Appendix: about Vytalix (stage-honest one-pager); relevant methods.

15. Social-media design (LinkedIn)

Templates (1080×1350 portrait for feed, 1200×627 for link posts):

- **Insight post:** Bone background, eyebrow "Vytalix Insight" in Teal, headline Fraunces 64px Ink (max 12 words), small Y-node bottom-right, page footer with the wordmark.
- **Quote/Stat post:** Deep background, stat or line in Fraunces 96px Bone with the key figure in Signal Mint, source line 24px Night Muted at the bottom. No stat without a source.
- **Announcement post:** Night background with confluence illustration, eyebrow "Update", headline 56px, one-line detail, CTA "Read more — link in comments".

Carousel structure (PDF, 1080×1350, 6–10 slides):

- 1. Hook — one claim we can stand behind, or one question.
- 2. Why it matters (with source).
- 3–7. One idea per slide, ≤ 30 words, consistent eyebrow numbering "02 / 08".
 - 1. What we'd do about it (the practical move).
 - 2. Honesty slide — "What we don't know yet" (this becomes a signature).
 - 3. Close — wordmark, "Technology for Life", how to get in touch.

Voice on LinkedIn: founder's first person is fine; company page uses "we". No engagement-bait, no "🚀". Stage disclosure in the About section: "Pre-seed, founder-led. MaternaLink is in development."

16. Brand-asset checklist

Asset	Status
Wordmark SVG (positive, reverse, mono)	DONE — website/assets/img/
Y-node mark SVG + favicon	DONE

Vytalix · > ****Update 8 September 2026 — the real logo.**** The founder supplied the Vytalix logo: a heart outline whose right-hand stroke becomes Technology a circuit trace ending in a node, the wordmark "Vytalix" and the strapline "Technology for Life", in a single deep blue sampled at for Life ****#153892****. The palette below is updated accordingly: ****Vytalix Blue #153892**** replaces "Vytal Teal" as the primary colour; Deep becomes #0F2354; Mist becomes #E9EDF8; the dark-surface highlight becomes #9DB8FF. Ember remains the single warm accent (≤5% of any surface). Logo files: `website/assets/img/vytalix-logo.png` (full lock-up, transparent) and `vytalix-mark.png` (heart mark). Do not redraw or recolour the logo: use the mark alone only below 120 px wide. Clear space = the height of the "V" on all sides.
