Priorities / Risks / Next actions	7

Owner: Founder (acting COO) · **Status:** PROPOSED · **Version:** 1.1 (8 September 2026; supersedes 1.0 — adds the four-way status columns, the David Agunede role matrix, per-SOP RACI, the 24-month cost roll-up, and aligns pricing floors and investor-CRM counts with `/assets/PRICING_STRUCTURE.md` and `/investors/INVESTOR_DASHBOARD.md`) · **Governed by:** `/FACTS_BASE.md` (language rules apply to every SOP output) · **Related:** `/docs/02_GROUP_STRUCTURE.md` (governance, advisory board, RACI), `/docs/13_SALES_ENGINE.md`, `/docs/14_MARKETING_AND_CONTENT_ENGINE.md`, `/docs/15_LEGAL_AND_REGULATORY.md`, `/docs/17_FOUNDER_OPERATING_SYSTEM.md`, `/docs/18_90_DAY_EXECUTION_PLAN.md`, `/operations/KPI_DASHBOARD.csv`, `/operations/PIPELINE_TRACKERS.csv`

Executive view

- Vytalix today is one person, no legal entity, no staff and one informal collaborator whose role is undefined (VERIFIED, FACTS_BASE \$1). The organisation is therefore designed as a **founder-led company with a bought-in bench**: twelve functions, nine founder-led for at least the first six months, three outsourced from Day 1 (legal/compliance, finance, clinical governance), and **no salaried hire before a signed engagement, a grant award or a closed round pays for it**.
- Every role in the 24-month plan is tied to a **trigger** (revenue threshold, funded milestone or decision gate), never to a calendar date. Year-1 bench cost is £28k–£64k (ESTIMATE); year-2 cost rises to £310k–£530k (ESTIMATE) only if the MaternaLink (in development) MVP is funded — otherwise Vytalix stays a two-person services firm (\$3.2).
- Eleven SOPs cover the loop that turns founder time into cash, capital and product — business development, investor acquisition, fundraising, product development, customer acquisition, customer onboarding, healthcare partnerships, due diligence, compliance, finance, reporting — each in one fixed format: **Trigger → Owner → Process (numbered) → Documents → Approval → KPI → Output**, so a virtual assistant, contractor or first hire can run it without the founder in the room.
- The SOPs hard-wire the three non-negotiables from the master audit: no MaternaLink claim beyond "in development" (a FACTS_BASE claims check is a numbered step in every external-facing SOP); no investor outreach before the five pre-conditions in `/investors/OUTREACH_ENGINE.md` are logged as met (earliest Wed 14 Oct 2026, Day 31); no processing of patient data without a DPIA and Clinical Safety Officer sign-off.
- Until incorporation, "Approval" in every SOP resolves to the founder alone, minuted in `/operations/DECISION_LOG.md` (TO CREATE Day 1). From the first board meeting (target Tue 13 Oct 2026, Day 30) the reserved matters in `/docs/02_GROUP_STRUCTURE.md` §4.1 pass to the board. KPIs named in the SOPs are the same definitions as `/operations/KPI_DASHBOARD.csv` and `/docs/17_FOUNDER_OPERATING_SYSTEM.md` §4.

1. Design principles

#	Principle	What it means in practice	Enforced by
1	Revenue funds people	No salaried hire until (a) trailing 3-month services revenue ≥ £10k/month, or (b) a round or grant that names the role has closed.	Hiring-trigger check in the monthly ritual (founder OS \$2.3)
2	Buy expertise, hire execution	Clinical safety, legal, accounting, regulatory, design and fractional CTO are bought by the day; the first hires are people who ship (engineer, delivery associate, VA).	\$2 status columns; \$3 plan
3	One accountable owner per function	Every function has exactly one accountable person at all times — even when that is the founder for nine functions at once.	\$2.1 single-owner map
4	Contractor IP always assigned	Every contractor, associate, adviser and developer signs the IP clause (<code>/docs/15_LEGAL_AND_REGULATORY.md</code> §9.1) before work starts. No exceptions, including David Agunede.	SOP 08 step 8; SOP 04 step 1
5	Nigeria delivered locally	In-country roles (country lead, CHEW trainers, engineers) are contracted in Nigeria through a local partner or employer-of-record, not relocated from the UK (employment route TO VALIDATE).	\$3 triggers; SOP 07
6	Founder time is the scarcest asset	≥ 70% of working time on Vytalix; within that, revenue 40% / investors 20% / product 20% / partnerships-credibility 20% for the first 90 days. Kemek Enterprise Ltd is a declared conflict capped at ≤ 30%.	Founder OS \$1 and weekly time audit
7	Every process ends in a number	Each SOP has a KPI that appears in the Friday review; an SOP with no reported KPI for two consecutive weeks is treated as not running.	SOP 11

2. Organisation structure — twelve functions

Status columns: **Required now** = must exist before revenue or a decision gate · **Outsource** = bought fractional/contract · **Hire later** = salaried, trigger-gated · **Founder-led** = founder is the accountable owner and the doer today. Costs are ESTIMATE, GBP, exclusive of VAT, September 2026 rates.

#	Function	Target roles (24-month state)	Required now	Outsource	Hire later	Founder-led	Indicative cost (ESTIMATE)	Hiring / engagement trigger
1	Board	Founder (sole director); one independent NED; investor director/observer at pre-seed	Yes — sole director from incorporation; NED by Month 3	NED (fee or unpaid)	Investor director only if a round lead requires	Yes (chair until NED)	NED £0–£6k/yr; D&O insurance £400–£1,000/yr once investors join	NED search instructed incorporation (Fri 25 Sep 2026); appointment or two final candidate Fri 11 Dec 2026 (Day
2	Executive Leadership	CEO (founder); fractional COO / Chief of Staff; CFO at Series A	Yes (CEO)	Fractional COO	CFO (Series A only)	Yes	Founder draw £0 until trailing-month revenue ≥ £7.5k, then £3k/month minimum (business model \$3); fractional COO £700–£1,000/day, 2 days/month	Fractional COO when services revenue ≥ £10k/month for 3 months or seed closed

#	Function	Target roles (24-month state)	Required now	Outsource	Hire later	Founder-led	Indicative cost (ESTIMATE)	Hiring / engagement trigger
3	Advisory Board	Six profiles: obstetrics; senior/digital midwife; NHS digital/commissioning; Nigerian health-system leader; regulatory/CSO; health-tech operator; optional lived-experience adviser (/docs/02_GROUP_STRUCTURE .md \$4.2)	Yes — none appointed (KNOWN); 2 signed by Day 60, 4 by Day 90	Advisers (options or fee)	—	Yes (recruits and runs)	0.25–0.5% options each vesting 24 months, or £500–£1,000/meeting; £4k–£8k/yr cash if fee-based	Approach from Fri 9 2026; letter only after written consent to named; not described "partners"
4	Technology	Fractional CTO; engineering lead + 2 engineers (UK lead + Nigeria pair); managed DevOps	Fractional CTO for the prototype audit (Day 15–30)	Fractional CTO £600–£900/day, 2–4 days/month	Engineers on funded MVP	Founder owns; CTO executes	Pre-funding £1.2k–£3.6k/month; MVP team £140k–£320k over 16 weeks (/product/MATERNALINK_MVP_SPEC .md)	Engineers only when MVP fund (grant or round with £150k allocated) deed executed, CSO engaged
5	Product	Founder as acting CPO; fractional product lead; Head of Product at seed	No (gates before build)	Fractional product lead 1 day/week	Head of Product £75k–£95k	Yes	Fractional lead £2k–£3.5k/month from a design-partner LOI	Fractional lead on the first UK design-partner on Nigeria NC cohort LOI Head of Product at seed close and v1.x LOI at ≥ 1 site
6	Healthcare / Clinical Governance	Clinical Safety Officer (DCB0129/0160); clinical adviser (advisory #1/#2); clinical lead at first evaluation site; Clinical Advisory Group	Yes — CSO identified by Wed 28 Oct (Day 45), engaged by Thu 12 Nov (Day 60)	CSO £500–£900/day, 1–2 days/month pre-build, 3–4 days/month in build	Clinical lead 0.2 FTE at evaluation site	Founder owns; CSO executes	£0.5k–£1.8k/month pre-build; clinical lead £15k–£25k/yr	CSO before any build work or hazard log; clinical lead when a UI service-evaluation site is agreed (Q2 2027 target, roadmap)
7	Commercial (Advisory, Consulting, E-Learning sales)	Founder as seller and lead deliverer; associate consultants per SOW; BD/delivery manager later	Yes — highest-priority founder function	Associates £700–£1,000/day list (contractor cost £450–£550) only against signed SOWs	BD/delivery manager £55k–£70k + commission	Yes	Associates funded from engagement margin	BD hire when services revenue ≥ £15k/month for 3 months or Maternal pilot pipeline ≥ 5 qualified organisations E-Learning sales four led until 2 courses live
8	Marketing	Founder as author; freelance designer/editor; part-time marketing executive	No (founder content cadence is required)	Designer £1k–£2k per report; editor £300–£600/article	Part-time marketer 0.5 FTE £18k–£25k/yr	Yes	Tooling £0–£150/month	Part-time marketer when inbound conversations ≥ 15/month for 2 months and revenue ≥ £10k/month
9	Operations	Founder; virtual assistant; Operations / Chief-of-Staff hire	No	VA £15–£25/hr, 10 hrs/week (£650–£1,100/month)	Ops hire at Month 12+ if ≥ 6 people	Yes	VA from first services revenue	VA when founder admin (CF logging, scheduling, invoicing, research) hrs/week 2 consecutive weeks (decision 16 Oct 2026)

#	Function	Target roles (24-month state)	Required now	Outsource	Hire later	Founder-led	Indicative cost (ESTIMATE)	Hiring / engagement trigger
10	Finance	Outsourced accountant; Xero; fractional FD; R&D tax adviser	Yes — accountant at incorporation	Accountant £80–£200/month; Xero £15–£30/month; fractional FD £800–£1,200/day	Finance manager only post-seed	Founder owns; accountant executes	Year 1 £1.2k–£2.8k	Accountant by Fri 25 Sept 2026; fractional on terms or cash > £250k; R&D adviser at MVP spend
11	Legal / Compliance	Fixed-fee start-up solicitor; trademark attorney; fractional DPO; regulatory consultant; Compliance lead later	Yes — solicitor and attorney by Fri 18 Sept 2026	Solicitor £4k–£9k (90 days); attorney £800–£2,000; DPO £0–£500/month Phase A; regulatory opinion £1.5k–£4k	Compliance/QA lead £60k–£80k or £900/day	Founder owns; professionals execute	Year-1 legal/compliance £9k–£18k (legal doc \$Executive view)	DPO before MaternalLink processes real data; Compliance lead only concludes "device" c ISO 27001/134 begins
12	Partnerships	Founder; Nigeria country lead (contract); partnerships manager	No	Nigeria country lead £1.5k–£3k/month (local rates TO VALIDATE)	Partnerships manager £45k–£60k at Month 18+	Yes	Country lead funded from pilot budget	Country lead when a Nigeria pilot is funded (NGO/donor cohort or state MoU with budget manager when ≥ 3 local partners)

2.1 Single-owner map (Day 1, Mon 14 September 2026)

Function	Accountable owner Day 1	Executes today	First delegate (when triggered)	Adviser / backup
Board; Executive Leadership	Founder	Founder	Independent NED (challenge, not execution)	Solicitor
Advisory Board	Founder	Founder (recruits)	—	Advisory #6 (operator) for introductions
Technology	Founder	Fractional CTO (audit)	Engineering lead at MVP	Advisory #6
Product	Founder	Founder	Fractional product lead	CSO; Advisory #1/#2
Healthcare / Clinical Governance	Founder	CSO (from Day 60)	Clinical lead at evaluation site	Advisory #1, #2, #5
Commercial	Founder	Founder	Associates (delivery); BD manager	Advisory #3 (NHS buying)
Marketing	Founder	Founder; freelance designer per asset	Part-time marketer	—
Operations	Founder	Founder	VA (from Month 2 if triggered)	—
Finance	Founder	Accountant	Fractional FD	—
Legal / Compliance	Founder	Solicitor; attorney; DPO (later)	Compliance lead	Advisory #5
Partnerships	Founder	Founder	Nigeria country lead	Advisory #3, #4

2.2 David Agunede — role options (decision required by Sun 20 Sept 2026, Day 7; see /docs/02_GROUP_STRUCTURE.md §3 and /docs/15_LEGAL_AND_REGULATORY.md §8.3)

If the IP outcome is...	Organisational role (PROPOSED)	Reports to	Compensation basis (PROPOSED)	Governance constraints
Option 1 — assignment for equity (default)	Head of Product Africa / Country Lead Nigeria (part-time); attends advisory board	Founder	Vested equity 5–12% (PROPOSED range) with good/bad-leaver; contract fee only when a Nigeria pilot is funded	Not a director until vesting cliff passed; signs IP deed, confidentiality and conflicts declaration
Option 2 — exclusive licence with option to acquire	External licensor and named Nigeria adviser	Founder (contractual)	Equity 2–5% and/or capped royalty; consultancy day rate for defined work	No authority to represent Vytalix; licence reviewed by solicitor
Option 3 — no agreement by Thu 12 Nov 2026 (Day 60)	No role; clean-room rebuild of v1; no use of his materials or the "Maternal Link" name	—	—	Standstill letter governs conduct until Day 60

Language rule: until an agreement is signed, David Agunede is described externally as "a collaborator on the MaternalLink concept", never as co-founder, CTO or Vytalix officer.

2.3 Decision rights by function (summary of /docs/02_GROUP_STRUCTURE.md §4.3)

Decision	Founder	Board (from Day 30)	Advisory board	Professional adviser
Proposals ≤ £25k; contractor spend ≤ £10k; spend ≤ £2,500 per item	Decides	Informed	—	—
Contracts > £50k; borrowing > £25k; issue of shares; salaries > £60k; any government proposal	Recommends	Decides (reserved matter)	Consulted	Solicitor reviews

Decision	Founder	Board (from Day 30)	Advisory board	Professional adviser
External clinical or regulatory claim	Recommends	Decides	Clinical adviser signs off	Solicitor on financial-promotion wording
Intended-use statement change; any line-crossing feature	Recommends	Decides	CSO advises in writing	Regulatory consultant
DPIA; safety case; hazard log	Owns	Informed	—	DPO signs DPIA; CSO signs safety case
Hires within budget and triggers	Decides	Informed	—	Accountant (payroll)

3. Twenty-four-month hiring plan (Sept 2026 – Sept 2028; trigger-gated; all costs ESTIMATE)

3.1 Plan by quarter

Quarter	Role	Type	Trigger (must be true before engagement)	Cost (ESTIMATE)	Funded by	Owner
Q4 2026 (Sep–Dec)	Solicitor; trademark attorney; accountant	Outsourced	Incorporation decision (Mon 14 Sept 2026)	£6k–£12k one-off; £80–£200/month	Founder capital (TO CONFIRM)	Founder
Q4 2026	Fractional CTO (audit scope)	Outsourced	Standstill letter signed; prototype access granted	£1k–£2.5k for audit	Founder capital	Founder
Q4 2026	Virtual assistant (10 hrs/week)	Contract	Admin > 8 hrs/week for 2 consecutive weeks	£650–£1,100/month	First services revenue	Founder
Q4 2026	Clinical Safety Officer (fractional)	Outsourced	Intended-use statement adopted (Day 3); build planned	£0.5k–£1.8k/month	Founder capital / first revenue	Founder
Q4 2026	2–4 advisory-board members	Advisory	Entity exists (options need a company); written consent to be named	£0 cash (options) or £2k–£4k/yr	Option pool	Founder
Q4 2026	Independent NED	Board	Incorporation; candidate via advisory network	£0–£6k/yr	Founder capital	Founder
Q1 2027 (Jan–Mar)	Associate consultant(s), 2–4 days/month	Contract per SOW	≥ 2 signed engagements needing capacity beyond 10 founder days/month	£450–£550/day cost	Engagement margin	Founder
Q1 2027	Fractional DPO	Outsourced	MaternaLink DPIA started; CRM/newsletter volumes growing	£0–£500/month	Revenue	Founder
Q1 2027	Fractional product lead (1 day/week)	Contract	Design-partner LOI (UK) or NGO-cohort LOI (Nigeria) signed	£2k–£3.5k/month	Revenue / grant	Founder
Q1–Q2 2027	Engineering lead + 2 engineers (UK lead + Nigeria pair)	Contract → employed	MVP funded (grant award or round with ≥ £150k allocated); IP deed executed; CSO engaged	£140k–£320k over 16 weeks	Grant / pre-seed	Founder + fractional CTO
Q2 2027	Fractional FD (1–2 days/month)	Outsourced	Term sheet received or cash > £250k	£0.8k–£2.4k/month	Round	Founder
Q2 2027	Freelance designer/editor (reports, site refresh)	Freelance	Report interviews complete	£1k–£2k per report	Revenue	Founder
Q2 2027	Clinical lead (0.2 FTE) at first evaluation site	Contract / secondment	UK service-evaluation site agreed	£15k–£25k/yr	Grant / round	Founder + CSO
Q3 2027	Nigeria country lead	Contract (local)	Nigeria pilot funded (NGO/donor cohort or state MoU with budget)	£1.5k–£3k/month	Pilot budget	Founder
Q3 2027	Part-time marketing executive (0.5 FTE)	Employed	Inbound ≥ 15/month for 2 months and revenue ≥ £10k/month	£18k–£25k/yr	Revenue	Founder
Q3 2027	BD / delivery manager	Employed	Services ≥ £15k/month for 3 months or pilot pipeline ≥ 5 qualified	£55k–£70k + commission	Revenue	Founder
Q4 2027	Fractional COO / Chief of Staff	Contract	Services ≥ £10k/month for 3 months or seed closed	£1.4k–£2k/month	Revenue / seed	Founder
Q4 2027	Head of Product	Employed	Seed closed; v1.x live at ≥ 1 site	£75k–£95k	Seed	Founder + board
Q1 2028	Regulatory / QA lead	Employed or fractional	G8 device decision = "device", or ISO 13485 decision for v3	£60k–£80k or £900/day	Seed	Founder + CSO
Q1–Q2 2028	Second engineering pair; support/implementation associate	Employed	≥ 2 paying sites or a scaled Nigeria pilot (≥ 5k women)	£110k–£160k/yr combined	Seed / pilot revenue	Head of Product
Q2–Q3 2028	Partnerships manager; E-Learning content producer	Employed	≥ 3 live partnerships; ≥ 2 courses live with ≥ 400 sales	£45k–£60k each	Revenue / seed	Founder

3.2 Cost and headcount roll-up (ESTIMATE)

Period	Employees	Contracted bench	Bench + people cost	Condition
Months 1–6 (Sep 2026 – Feb 2027)	1 (founder, £0 draw until trailing revenue ≥ £7.5k/month)	5–7 (solicitor, attorney, accountant, CTO, CSO, VA, advisers)	£14k–£32k	Founder capital + first engagements
Months 7–12 (Mar – Aug 2027)	1–4 (founder; engineers only if MVP funded)	6–8	£14k–£32k without MVP; +£140k–£320k with MVP	Grant or pre-seed decides
Year 1 total	1–4	6–8	£28k–£64k (services path); £170k–£380k (funded MVP path)	
Months 13–24 (Sep 2027 – Aug 2028)	2 (services path) or 8–12 (seed path)	6–8	£45k–£90k (services path); £310k–£530k (seed path)	Seed close and pilots landing

Rule: if neither the seed nor a funded pilot lands, the company stays at ≤ 2 employees and remains a services firm (business model \$Executive view, point 5). No role above is hired "in anticipation".

4. Standard operating procedures

Format for all eleven: **Trigger** → **Owner** → **Process (numbered)** → **Documents** → **Approval** → **KPI** → **Output**. Templates referenced live in `/operations/` (TO CREATE where marked) or in the named documents. Every SOP that produces external material includes a FACTS_BASE claims check as a numbered step. KPI names match `/operations/KPI_DASHBOARD.csv` (Section / KPI / Formula / Unit / Period / Target / Actual / Status_label / Source_system / Owner).

SOP 01 — Business development (Advisory / Consulting)

Trigger: Monday 08:00 weekly plan (founder OS \$2.2); any inbound enquiry (respond within 24 hours); from Mon 28 Sept 2026 (Week 3) the weekly quota applies without exception.

Owner: Founder (acting Head of Sales). VA (when engaged) does lead research and CRM logging; associates never sell.

Process:

1. Pull the ICP list (`/docs/13_SALES_ENGINE.md` §1, segments S1–S2 first; 150 contacts with source URLs by Fri 18 Sept) and confirm the weekly quota: **40 new contacts, 20 conversations, 5 discovery calls, 2 proposals**.
2. Research each contact: role, organisation, funding stage, stated problem; public business email/LinkedIn only; record the source URL in HubSpot Free CRM (stages per sales doc §3.1).
3. Score the lead (sales doc §4): A ≥ 70 = call within 48 h; B = weekly nurture; C = monthly content only.
4. Send the first touch (templates E1/L1, sales doc §12–13) with one personalised reason; log it the same day; daily minimum 8 new contacts and 5 follow-ups.
5. Follow up at +4, +10 and +21 days; three touches without reply = "Closed-lost: no decision" with a coded reason, never deleted; re-contact diarised at 90 days.
6. On a reply, offer three 30-minute slots within 5 working days; send the discovery agenda 24 h before.
7. Run the discovery call to the 30-minute script (sales doc §5); capture Problem / Budget / Authority / Timeline / Success criteria in the CRM within 30 minutes of the call.
8. Within 48 h decide: proposal, second call, refer out, or close-lost with reason code.
9. Draft the proposal from the package menu (`/docs/01_BUSINESS_MODEL.md` §4.1: A1, A2, C1–C8, T1; prices per `/assets/PRICING_STRUCTURE.md`; template `/assets/PROPOSAL_TEMPLATE.md`): fixed price, scope, start date, 14-day validity; packages gated "proof required to sell" (C3, C5, C8) are not quoted until the capability exists.
10. FACTS_BASE claims check: no client names without consent, no MaternaLink capability claims, "MaternaLink (in development)" only.
11. Send; move the deal to "Proposal sent" (50%); diarise +3 (call) and +7 (email) follow-ups — hand-off to SOP 05.
12. Friday 15:00 pipeline clean: every open deal has a next action dated within 7 days; weighted pipeline written to `/operations/PIPELINE_TRACKERS.csv` (Revenue tracker rows).

Documents: ICP list; HubSpot CRM; outreach templates E1–E3, L1–L2; discovery script and 20 questions (sales doc §5); proposal template; `/assets/SERVICE_CATALOGUE.md`; `/assets/PRICING_STRUCTURE.md`; loss-reason codes; `/operations/SOW_TEMPLATE.md` (TO CREATE; solicitor review before first use).

Approval: Founder for proposals $\leq$ £25k; board (once formed) for any contract $>$ £50k or any proposal to a public body (reserved matter); solicitor for non-standard terms.

KPI: Leads 40/week; Conversations 20/week; Meetings (discovery calls held) 5/week (Month 1 target 10, Month 2 15, Month 3 15); Proposals sent 2/week (Month 1 3, Month 2 4, Month 3 5); reply rate $\geq 8\%$ email, $\geq 15\%$ LinkedIn; lead → conversation $\geq 50\%$; conversation → meeting $\geq 33\%$; meeting → proposal $\geq 30\%$; first signed engagement by Tue 13 Oct 2026 (Day 30), three by Sat 12 Dec (Day 90).

Output: Weekly pipeline snapshot (Revenue tracker); proposals sent; discovery notes in CRM; deals at "Proposal sent" handed to SOP 05.

SOP 02 — Investor acquisition (identification to first meeting)

Trigger: All five pre-conditions in `/investors/OUTREACH_ENGINE.md` logged as met in the decision log: (1) incorporated; (2) MaternaLink IP heads of terms signed (deed executed or licence documented by Day 30); (3) 2025 clinical-AI claims retired from all materials; (4) one-pager and data-room v1 ready; (5) SEIS/EIS advance assurance submitted ("applied for", never "approved"). Earliest start: **Wed 14 Oct 2026 (Day 31)**. Before that date the SOP runs in preparation mode only (steps 2–4).

Owner: Founder. VA maintains CRM hygiene and re-verification. Solicitor signs off financial-promotion wording (engine §9).

Process:

1. Pre-condition check written into `/operations/DECISION_LOG.md`; if any item is open, stop — no outreach, no "soft" messages, no LinkedIn pitching.
2. Work from the investor assets in `/investors/`: master CRM `VYTALIX_INVESTOR_CRM.csv` / `.xlsx` (319 records per `INVESTOR_DASHBOARD.md`, 7 A-tier, 87 B-tier — VERIFIED at CRM build; note the 90-day plan's "253" predates the angel-network and strategic top-ups); ranked list `TOP_25_INVESTORS.md`; `CALL_LISTS.md` (List 1 = Top 25, List 2 = Next 50, List 3 = Next 75, List 4 = remainder); per-investor scripts `OUTREACH_TOP25.md`; stage rules `CRM_PIPELINE.md` (18 stages; every record enters at Researched; "Outreach Ready" requires the pre-conditions). Grant and contract funders sit in `NON_DILUTIVE_FUNDING_ROUTES.md` and are worked under SOP 03, not here.
3. Re-verify every record before contact (team page, mandate, ticket, phone route, "Last Verified" date): List 1 by Fri 16 Oct; Lists 2–3 in the week before each is worked. Phone numbers only from public sources with URL and date; never personal mobiles; "PHONE NOT PUBLICLY AVAILABLE" stays as is — use the stated route.
4. Prepare the one personalised reason per investor (named portfolio company, thesis or public statement) from `OUTREACH_TOP25.md`; edit for voice; replace [Founder], [company number], [link].
5. Sequence: List 1 in Weeks 6–7 (to Fri 30 Oct, Day 47); List 2 in Weeks 8–9 (to Thu 12 Nov, Day 60); List 3 in Weeks 10–12 (to Fri 4 Dec, Day 82); referrals from earlier lists worked first; List 4 thereafter or on referral.

- Contact: phone-first where a verified public number exists (engine \$2 opening, 25 seconds); otherwise email (engine \$3, under 150 words) or LinkedIn (engine \$4). Cadence: call → same-day email → +4 → +10 → +21 → quarterly update. No follow-up #2 without a new proof point (create one first).
- Log every touch the same day in `CRM Status`; regenerate the CRM, Top 25, call lists and dashboard every Friday with `python3 investors/build_crm.py`; edits go into `investors/raw/*.csv`, never into the generated files.
- On a reply, offer three 30-minute slots within 7 days; send the one-pager 24 h before; run the meeting to the 30-minute structure (engine \$6); ask "what would stop you?" and commit to a written answer within 48 h (engine \$8 objection table).
- Close every meeting with a dated next step and one referral ask; investors at "Meeting Completed" who request the data room are handed to SOP 03.
- Weekly: count Identified → Contacted → Calls → Meetings → Discussions; write the Investment rows of `/operations/KPI_DASHBOARD.csv` and the Investor tracker rows of `/operations/PIPELINE_TRACKERS.csv`.

Documents: `/investors/VYTALIX_INVESTOR_CRM.csv` and `.xlsx`; `TOP_25_INVESTORS.md`; `CALL_LISTS.md`; `OUTREACH_TOP25.md`; `OUTREACH_ENGINE.md`; `CRM_PIPELINE.md`; `INVESTOR_DASHBOARD.md`; `build_crm.py` and `raw/`; one-pager (`/assets/INVESTOR_ONE_PAGER.md`); deck v1 (`/assets/INVESTOR_PITCH_DECK.md`, stage-honest); data-room index; FCA financial-promotion checklist (engine \$9).

Approval: Founder confirms pre-conditions in writing; solicitor signs off deck disclaimers and promotion wording before the first send; board (once formed) approves round parameters before any term is discussed.

KPI: Contacted (records with ≥ 1 logged outbound touch): Month 2 50, Month 3 75, cumulative 125 by Day 90; Calls (attempts on verified public numbers) 40 / 60 / 100 cumulative; Meetings ("Meeting Completed") 4 / 6 / 10 cumulative; contacted → meeting ≥ 8%; weekly volume in Weeks 6–12: 15 calls, 25 emails, 20 LinkedIn touches, 3 meetings; ≥ 1 referral per meeting; CRM regenerated 100% of Fridays.

Output: Investor tracker rows; meeting notes in `CRM Status`; investors requesting the data room handed to SOP 03; monthly investor update list (everyone at "Responded" or later).

SOP 03 — Fundraising (from investor interest to money received; includes non-dilutive)

Trigger: An investor requests the data room or a second meeting; **or** a grant/contract call opens that fits (`/investors/NON_DILUTIVE_FUNDING_ROUTES.md`: Innovate UK Smart, SBRI Healthcare, NIHR i4i, Grand Challenges Canada, others — eligibility TO VALIDATE per call); **or** the board decides to open a round.

Owner: Founder; accountant (SEIS/EIS, tax); solicitor (instruments, promotion wording); fractional FD once a term sheet exists.

Process:

- Define the round on one page: amount (pre-seed £150k–£300k, ESTIMATE per `/docs/02_GROUP_STRUCTURE.md` \$2; rounds table in `/docs/08_FINANCIAL_MODEL.md` \$4.2), instrument (SEIS/EIS-compatible advance subscription agreement or priced round — solicitor to advise), use of funds, 12-month milestones, cap-table impact including any IP-settlement equity.
- Assemble data-room v1 (index `/operations/DATA_ROOM_INDEX.md`, TO CREATE): one-pager; deck; financial model summary from `/finance/Vytalix_Financial_Model_3yr.xlsx` (scenarios labelled, not forecasts); IP agreement summary; cap table; advisory board (named only with consent); pilot plan; risk register; policies adopted; SEIS/EIS advance-assurance letter or "applied for"; Q&A log.
- Grant branch: check eligibility (UK-registered company, NHS or clinical partner where required, match funding); score bid/no-bid with `/docs/20_DECISION_FRAMEWORK.md`; allocate 10–15 founder days per bid; first decision Fri 23 Oct 2026; target ≥ 1 bid by Day 90 if a call is open, ≥ 4 per year; separate cost centre opened on award (SOP 10 step 9).
- Send the data room via a tracked link; log the date; answer every diligence question within 48 h; keep the Q&A log current.
- Second meeting: present the 90-day milestone plan and the audit-score trend; ask for their diligence list, decision process and timeline.
- Introduce advisers and, where relevant, a design-partner contact — only with their written consent.
- Term discussion: solicitor reviews every document; secure a lead first, then fill; never accept an anti-dilution floor for the IP settlement (structure doc \$3); board approves terms.
- Close: signed documents; funds received and reconciled in Xero; Companies House filings (SH01, PSC changes); SEIS1/EIS1 compliance statements via the accountant; cap table updated.
- Post-close: monthly one-page investor update; board/observer rights implemented; D&O insurance bound (legal doc \$11).

Documents: Round one-pager; data room; Q&A log; term sheet; subscription documents; SEIS/EIS advance-assurance application and compliance statements; grant application templates; cap-table model; `/docs/09_FUNDING_STRATEGY.md`.

Approval: Board approves round terms and issue of shares (reserved matter); solicitor signs off all instruments and financial-promotion compliance; accountant signs off SEIS/EIS.

KPI: Discussions (active, at "Due Diligence" or "Investment Discussion"): Month 2 1, Month 3 2; data rooms sent → second meetings ≥ 40%; diligence answers within 48 h 100%; first meeting → term sheet ≤ 90 days (ESTIMATE); Grant bids submitted ≥ 1 by Day 90 (if a call is open); Committed (£, signed not received) and Received (£) reported monthly — base case £0 by Day 90.

Output: Signed instruments; cash in bank; filings; updated cap table; monthly investor update; grant submissions.

SOP 04 — Product development (MaternaLink (in development))

Trigger: Gate G0 (IP/ownership documented) passed **and** a minuted build decision (MVP build / build-lite / wait, due Tue 8 Dec 2026, Day 86); or any request to change scope, intended use or a feature.

Owner: Founder as acting CPO until a fractional product lead is engaged; fractional CTO for technical decisions; CSO for clinical safety.

Process:

- Confirm the gates before any sprint: G0 IP deed executed; prototype audit passed or "rebuild" chosen (`/docs/04_MATERNALINK_PRODUCT_STRATEGY.md` \$25); CSO engaged and hazard log open; DPIA v0.1 started; intended-use statement adopted (\$21.1); every contributor has signed the IP clause.

2. Work only from `/product/MATERNALINK_PRD.md` (118 requirements, MoSCoW) and `/product/MATERNALINK_MVP_SPEC.md`; no requirement added or re-prioritised without a PRD change record.
3. Two-week sprints: planning Monday; 15-minute daily stand-up (async acceptable); review and retrospective on the second Friday; founder attends the review only.
4. **Line-crossing check** on every feature: does it interpret, score, alert on, triage or predict from clinical information? If yes, it is out of v1 and logged for the G8 qualification decision (strategy \$21.2).
5. Every user-facing content item passes clinical sign-off (advisory #1/#2 or CSO) before release; sign-off ID logged.
6. Hazard log (DCB0129) updated at each sprint review; new hazards assessed by the CSO within 5 working days.
7. Security in the definition of done (MVP spec): audit logging, encryption, secrets management, dependency scanning; **no real patient data in any non-production environment**; the Vercel prototype processes no real data until the audit passes.
8. Discovery loop: ≥ 20 women and ≥ 10 professionals per market interviewed before MVP freeze (strategy \$3.2); UK discovery interviews 15 by Day 60 feed personas and report 1.
9. Release: staging $\rightarrow$ penetration test (before go-live and after major change) $\rightarrow$ safety-case sign-off $\rightarrow$ production; plain-English release notes.
10. Monthly: Features (Must delivered $\div$ Must total), Users, Activation, Retention and Milestones reported to the Product rows of the KPI dashboard and the Product tracker.

Documents: PRD; MVP spec; `/product/MATERNALINK_ROADMAP.md`; intended-use statement; hazard log and clinical safety case; DPIA; sprint board; release notes; PRD change records; prototype audit report.

Approval: Intended-use or scope changes — board (reserved matter) with CSO written advice; feature release — CSO safety-case sign-off + founder; content — clinical adviser sign-off.

KPI: Milestones closed per month (Month 1: IP heads of terms, claims retired, intended-use adopted; Month 2: prototype audit, CSO engaged, PRD v0.2 signed off; Month 3: DPIA v0.1, safety-case skeleton, MVP decision minuted) = 3/3/3; Features delivered 0 until funded (no build before funding); sprint commitment delivered $\geq 80\%$ once building; open critical hazards at release = 0; critical/high vulnerabilities open > 14 days = 0; Discovery interviews 4 / 10 / 16 cumulative by month.

Output: Gate evidence (deed, audit report, CSO letter, DPIA); shippable increments once funded; updated hazard log and safety case; DTAC readiness pack; monthly Product KPI rows.

SOP 05 — Customer acquisition (proposal to signature)

Trigger: A proposal has been sent (SOP 01 step 11), or a pilot-scoping conversation reaches "budget and authority confirmed".

Owner: Founder.

Process:

1. Follow up at +3 days (call) and +7 days (email carrying one new proof point: adviser confirmed, article published, template shared, report finding).
2. Handle objections with the sales doc \$15 table; price objections are answered with scope options, never with a price below the floor.
3. Negotiate within guardrails (`/assets/PRICING_STRUCTURE.md`, which supersedes the older figures in sales doc \$16); founder day floor £1,200 (list £1,500); associate list £700–£1,000; discount $\leq 10\%$ founder discretion, $\leq 15\%$ for multi-package bundles, always with a scope or concession trade; fixed-fee sprints $\pm 10\%$; payment 50% on signature under £20k, 30/40/30 above; 14-day terms; retainers monthly in advance; government (Nigeria) work only after a $\geq 30\%$ mobilisation payment.
4. Confirm the contracting entity: pre-incorporation = founder personal contract with PI insurance and a novation clause (legal doc \$1); post-incorporation = company MSA + SOW.
5. Issue MSA + SOW by e-signature with the data-handling statement (no patient data in advisory work; SOP 09 if any personal data must flow).
6. On signature: raise the deposit invoice the same day (SOP 10); move the deal to Closed-won; record source channel, days-to-close and package code.
7. Send the welcome note with kick-off date and onboarding checklist (SOP 06) within 24 h.
8. If lost: code the reason; diarise a 90-day re-contact; ask for a referral.

Documents: Proposal; MSA; SOW; e-signature tool; pricing guardrails; invoice template; loss-reason codes; objection table.

Approval: Founder $\leq$ £25k; board $>$ £50k; solicitor for any non-standard clause (liability cap, IP, exclusivity, equity-for-services).

KPI: Customers (signed SOWs): Month 1 1, Month 2 1, Month 3 1 (cumulative 3); proposal $\rightarrow$ customer $\geq 25\%$; median days proposal $\rightarrow$ signature ≤ 21 ; first-invoice-on-signature 100%; discounts below floor 0; Contracted revenue Month 1 £3k–£6k, Month 2 £6k–£10k, Month 3 £8k–£14k, cumulative £15k–£30k (ESTIMATE, not a forecast).

Output: Signed MSA/SOW; deposit invoice; CRM record Closed-won; Revenue tracker updated; hand-off to SOP 06.

SOP 06 — Customer onboarding (signature to first value)

Trigger: Signed SOW received.

Owner: Founder (delivery lead); VA for logistics; associate if assigned (IP clause signed first).

Process:

1. Within 24 h: create the private engagement folder (`/clients/<code>/`) with SOW, contacts, success criteria and the deliverable schedule.
2. Within 3 working days: 45-minute kick-off — confirm scope, deliverables, dates, counterpart, decision-maker, weekly 30-minute check-in, and "done" in the client's words.
3. Send the kick-off note within 24 h (scope confirmation, timeline, risks, next actions) — the baseline for change control.
4. Set up working tools: shared folder, meeting series, NDA if not in the MSA; confirm in writing that no personal or patient data will be shared (or trigger SOP 09 before anything moves).
5. Deliver the first tangible output within 10 working days (interview summary, framework, draft outline) — first value fast.
6. Weekly check-in: progress, blockers, decisions needed; logged in the engagement file.
7. Mid-point review for engagements ≥ 3 weeks: scope-drift check; change request if needed ($> 10\%$ of value = re-quoted SOW).

8. Final deliverable → review meeting → sign-off note → final invoice → 10-minute feedback call (NPS; testimonial request with written consent before any use).
9. Close: archive; add reusable assets (playbooks, templates) to the internal library; case study only with client consent and FACTS_BASE-compliant wording.

Documents: Engagement folder template; kick-off agenda and note; weekly check-in log; change-request form; sign-off note;
[/operations/CLIENT_FEEDBACK_FORM.md](#) (TO CREATE).

Approval: Founder signs off deliverables; client counterpart signs the sign-off note; change requests > 10% of value re-quoted.

KPI: Kick-off within 3 working days 100%; first value within 10 working days 100%; on-time delivery 100%; NPS ≥ 8/10; reusable asset per engagement ≥ 1; referral or testimonial from ≥ 50% of engagements; first testimonial with consent by Fri 11 Dec 2026.

Output: Delivered engagement; final invoice paid; feedback score; reusable assets; referral or testimonial.

SOP 07 — Healthcare partnerships (NHS, private providers, NGOs, ministries, incumbents)

Trigger: Quarterly partnership planning (first: week of Mon 21 Sept 2026); any inbound approach from a healthcare organisation; any decision in [/docs/20_DECISION_FRAMEWORK.md](#) that requires a partner; the Ekiti go/no-go inputs (status call by Fri 9 Oct; mDoc conversation by Fri 6 Nov; two-state scorecard by Fri 6 Nov).

Owner: Founder; advisory #3 (NHS) and #4 (Nigeria) as advisers; Nigeria country lead when engaged.

Process:

1. Maintain the partnership long-list in the Partnership tracker ([/operations/PIPELINE_TRACKERS.csv](#)): type (design partner, clinical-academic, NGO implementer, incumbent complementarity, ministry, insurer/telecom), value to Vytalix, value to them, gate dependencies.
2. Qualify against the partnership model ([/docs/04_MATERNALINK_PRODUCT_STRATEGY.md](#) §10 and [/docs/12_PARTNERSHIP_STRATEGY.md](#)): what they must have (active maternity improvement programme, digital midwife role, existing cohort, donor funding) and what Vytalix offers (non-diagnostic v1, evidence generation, no cost to the partner in the first stage).
3. Approach with a one-page partnership brief; never state or imply an existing relationship with any government, NHS body or the incumbent (mDoc) in any material.
4. Ekiti and Nigeria: (a) status call on the March 2026 proposal — facts only, no new offer; (b) one exploratory complementarity conversation with mDoc; (c) scorecard for two alternative states (market doc §2.1); G-D decision at the board on Thu 12 Nov 2026 (Day 60). The £4.5m / £300-per-woman proposal is not restated under any option.
5. Ladder every partnership: conversation → written brief → LOI/MoU → pilot or evaluation agreement → contract. An MoU is never described as a "partnership" in investor material (FACTS_BASE §4).
6. Every LOI/MoU reviewed by the solicitor; anti-bribery clause and conflict-of-interest declaration in every government-facing document (UK Bribery Act applies extraterritorially); no facilitation payments.
7. Any partnership involving patient data triggers SOP 09 (DPIA, data-sharing agreement, CSO review) before any data moves.
8. Monthly: update the tracker; report every government proposal to the board (reserved matter).

Documents: Partnership long-list; one-page brief template ([/assets/PARTNERSHIP_DECK.md](#) as source); LOI/MoU templates (solicitor); state scorecard; anti-bribery policy; conflicts register; gifts and hospitality register.

Approval: Founder for conversations and briefs; board for any MoU, government proposal or pricing to a public body; solicitor for every signed document.

KPI: Qualified partnership conversations/month ≥ 4 UK, ≥ 2 Nigeria from Month 2; Design-partner conversations at "brief sent" or later: Month 1 1, Month 2 3, Month 3 5; ≥ 1 LOI in drafting by Day 90; Ekiti status logged as KNOWN by Fri 9 Oct; mDoc conversation held by Fri 6 Nov; first conversation → LOI ≤ 90 days (ESTIMATE).

Output: Updated Partnership tracker; briefs sent; LOIs/MoUs; documented G-D recommendation for Day 60.

SOP 08 — Due diligence (on partners, contractors, advisers, investors and the prototype)

Trigger: Before signing any agreement with a third party (contractor, associate, adviser, partner, investor, vendor), and before accepting any inbound code or data — the Vercel prototype (<https://maternal-health-psi.vercel.app/>) is the first case, due Tue 13 Oct 2026 (Day 30).

Owner: Founder; solicitor for legal checks; fractional CTO for code; accountant for financial checks where relevant.

Process:

1. Identity and existence: Companies House (UK) / CAC (Nigeria) / equivalent; directors; sanctions and PEP screening for government-facing and Nigeria dealings (screening tool TO VALIDATE).
2. Reputation: public-record search (litigation, regulatory action, press); two references for contractors and associates.
3. Conflicts: check the conflicts register (Kemek Enterprise Ltd declared); investor conflicts (competing portfolio companies) noted, not disqualifying.
4. Capability: portfolio or case evidence for contractors; for investors, fund status and ticket confirmed from a public source (CRM "Qualified" rule).
5. Code/prototype: authorship and repository ownership; dependency licences; secrets scan; data held and region; credentials; security posture — pass conditions in product strategy §25. Until passed, the prototype is a demo asset and processes no real data.
6. Data: what personal data (if any) would flow; controller/processor roles; sub-processors; region; DPA needed.
7. Financial: counterparties paying Vytalix > £10k — credit check (tool TO VALIDATE); Vytalix payments > £5k — milestone-based terms.
8. IP: the IP-assignment clause is signed before any work starts; for the prototype, confirm who wrote the code and on what terms before any reuse.
9. Record a one-page DD memo: pass / pass with conditions / fail; conditions become contract clauses.

Documents: [/operations/DUE_DILIGENCE_CHECKLIST.md](#) (TO CREATE); DD memo template; prototype audit checklist (strategy §25); conflicts register; sanctions screening record; IP audit questionnaire (sent to David Agunede Wed 16 Sept 2026).

Approval: Founder for contractors ≤ £10k and advisers; board for partners, investors and anything > £10k; solicitor where legal warranties are relied on.

KPI: 100% of agreements have a DD memo before signature; prototype audit complete by Tue 13 Oct 2026 with a pass / conditions / fail verdict; DD turnaround ≤ 5 working days for standard cases; 0 contributors without a signed IP clause.

Output: DD memos; contract conditions; conflicts register update; prototype audit report (reuse vs rebuild recommendation for G-B).

SOB 09 — Compliance (data protection, clinical safety, claims, corporate, security)

Trigger: The compliance calendar (/docs/15_LEGAL_AND_REGULATORY.md §14); any new processing activity; any new external material; any incident; any partnership or engagement that touches personal or patient data.

Owner: Founder (acting Risk & Compliance lead); fractional DPO; CSO; solicitor.

Process:

1. Corporate: confirmation statement, accounts, statutory registers, board minutes per the calendar; conflicts register reviewed quarterly.
2. Data protection: ICO registration (Tier 1, £52) by Fri 2 Oct 2026; legitimate-interests assessment for outreach; privacy notice live before any web form; RoPA by Day 30; DPIA before any patient-data processing (v0.1 by Fri 4 Dec 2026); breach procedure with 72-hour ICO notification readiness; NDPA/NDPC analysis before any Nigeria deployment.
3. Clinical safety: intended-use statement enforced feature-by-feature; hazard log and safety case owned by the CSO; any line-crossing feature logged for G8; regulatory qualification opinion commissioned by Day 45.
4. Claims sign-off: every external artefact (post, deck, proposal, web page, grant bid, investor update) passes the checklist — "MaternaLink (in development)"; no NHS-approved / clinically validated / CE-UKCA / MHRA / government-partner / mortality-reduction claims; every statistic cited to its source; log the check.
5. Security: password manager, MFA and device encryption on every account from Day 1; Cyber Essentials self-assessment started by Day 60, certified by Day 90 (target); security policy P0 items adopted at the first board meeting.
6. Insurance: PI and PL bound before the first paid engagement (Fri 2 Oct 2026); cyber before personal data at scale; D&O on first external investment; annual renewal.
7. Anti-bribery and government dealings: policy adopted at the first board meeting; gifts and hospitality register; every Nigeria payment through a contracted, invoiced route.
8. Incidents: log → contain → assess (DPO/CSO) → notify (ICO/NDPC/client) within statutory windows → root cause → policy update.
9. Quarterly 30-minute compliance review against the risk register (legal doc §13); statuses and owners updated; report to the board.

Documents: Compliance calendar; policy set (legal doc §9.2); ICO registration; RoPA; LIA; DPIA template; hazard log; /operations/CLAIMS_CHECKLIST.md (TO CREATE); incident log; gifts register; risk register; insurance schedules.

Approval: Board adopts policies and approves any clinical/regulatory claim (reserved matter); DPO signs DPIAs; CSO signs safety cases; solicitor signs contracts and financial-promotion wording.

KPI: Compliance-calendar items on time 100%; external artefacts with a logged claims check 100%; open P0 compliance items at Day 30 = 0; reportable incidents = 0; Cyber Essentials certified by Fri 11 Dec 2026; ICO reference number by Fri 2 Oct 2026.

Output: Registrations and certificates; signed policies; claims-check log; DPIA; quarterly compliance report to the board.

SOB 10 — Finance (invoicing, cash, spend, bookkeeping, tax)

Trigger: Any signed SOW (invoice); Friday 16:15 cash check; monthly close on the 5th working day; any spend > £250; any grant award.

Owner: Founder; accountant (close, tax, filings); VA (invoice chasing, receipts); fractional FD when engaged.

Process:

1. Invoice on signature (deposit) and on milestones exactly as the SOW states; 14-day terms; Xero invoice with GoCardless/Stripe link; pre-incorporation invoices on the founder's personal contract are novated on incorporation.
2. Chase: day 7 automated reminder; day 15 call; day 30 formal letter; no new work on an account > 30 days overdue without a founder decision.
3. Weekly (Friday 16:15): reconcile the bank in Xero; update cash, receivables, payables and the 13-week cash-flow (/operations/CASHFLOW_13WEEK.xlsx , TO CREATE; v0 by Fri 18 Sept); compute runway.
4. Spend: > £250 needs a one-line justification against the budget (/finance/Vytalix_Financial_Model_3yr.xlsx ; 90-day budget in the execution plan §8, £10.5k–£25.75k ESTIMATE); > £2,500 needs a written quote comparison; borrowing > £25k or a contract > £50k is a board reserved matter.
5. Founder draw: £0 until Month 3; then £3,000/month minimum only when trailing-month revenue $\geq$ £7,500 (break-even rule, business model §3); otherwise deferred and logged to the founder loan account (accountant to structure).
6. Separate ventures: no Kemek Enterprise Ltd transactions through Vytalix accounts; any shared cost apportioned by written policy and minuted as a related-party matter.
7. Monthly close by the 5th working day: P&L, balance sheet, cash, burn, runway, EBITDA; variance to model; Finance rows of the KPI dashboard updated with ACTUAL labels.
8. Tax and filings: Corporation Tax registration; VAT monitored against the threshold (£90k, TO VALIDATE); PAYE only when salaried; R&D relief assessed at first MVP spend; SEIS/EIS compliance statements after any investment.
9. Grants: separate cost centre; timesheets for match-funding evidence; claims submitted per funder schedule.

Documents: Xero; invoice template; 13-week cash-flow; budget vs actual; founder loan account record; expense policy (£250 / £2,500 / £25k thresholds); grant timesheets.

Approval: Founder $\leq$ £2,500; board above, or for borrowing > £25k; accountant signs off filings.

KPI: Invoice within 24 h of trigger 100%; Debtor days ≤ 30 ; monthly close by working day 5 100%; Runway ≥ 6 months by Month 3 (target) or cash-positive; spend variance to budget $\leq 10\%$; zero missed statutory filings; Revenue (invoiced) Month 1 £0–£3k, Month 2 £4k–£8k, Month 3 £7k–£12k (ESTIMATE).

Output: Invoices and receipts; weekly cash position; monthly management accounts; Finance KPI rows; filings.

SOP 11 — Reporting (weekly, monthly, quarterly; board and investors)

Trigger: Friday 15:30 (weekly review); 5th working day (monthly); quarter-end + 10 days (quarterly); every board meeting (Tue 13 Oct, Tue 10 Nov, Tue 8 Dec 2026); investor update date (first Thu 5 Nov 2026).

Owner: Founder; VA compiles data; accountant supplies Finance rows.

Process:

- 1. Weekly: complete the review template in `/docs/17_FOUNDER_OPERATING_SYSTEM.md` §5 (revenue, investor interest, product, partnerships, attention); update `/operations/KPI_DASHBOARD.csv` and `/operations/PIPELINE_TRACKERS.csv`; 45 minutes maximum; file as `/operations/reports/YYYY-www.md`.
- 2. Monthly: one-page management report — all five KPI sections with formulas and variance to Month 1–3 targets; top 3 wins, top 3 misses, decisions needed; re-score the 22 audit areas in `/docs/00_MASTER_AUDIT.md` §2 (first re-score Wed 14 Oct 2026; target ≥ 20 / ≥ 27 / ≥ 32 at the three closes, ≥ 35 by mid-December).
- 3. Quarterly: strategy review against the execution-plan gates; decision-framework re-score of live ideas; hiring-plan triggers checked (§3); risk register refreshed; next-quarter plan with owners and dates (first: week of Mon 14 Dec 2026).
- 4. Board pack: agenda, previous minutes, management report, cash and runway, reserved-matter decisions, compliance report, risk register — circulated 3 working days before.
- 5. Investor update: one page monthly to everyone at "Responded" or later — metrics, progress, asks, what changed; stage-honest language per FACTS_BASE.
- 6. Every number in every report carries its label (ACTUAL / TARGET / ESTIMATE); no actual is claimed before it occurs; every value is traceable to the source system named in the CSV.
- 7. Archive all reports in `/operations/reports/YYYY-MM/` (TO CREATE).

Documents: Weekly review template; KPI dashboard CSV; pipeline trackers CSV; monthly report template; `/operations/BOARD_PACK_TEMPLATE.md` (TO CREATE); investor update template; audit re-score sheet.

Approval: Founder issues weekly and monthly reports; board approves minutes and pack; investor updates pass the claims check (SOP 09 step 4).

KPI: Weekly review completed by Friday 17:00 100% (13/13 in the 90 days); monthly report by working day 5 100%; board pack 3 days ahead 100%; investor update sent monthly 100%; audit re-score monthly, ≥ 35 by Sat 12 Dec 2026.

Output: Weekly review; monthly management report; quarterly strategy review; board pack and minutes; investor update; updated audit score.

5. SOP coverage map and RACI

5.1 Hand-offs

From	To	Hand-off artefact
SOP 01 Business development	SOP 05 Customer acquisition	Proposal sent
SOP 05 Customer acquisition	SOP 06 Onboarding; SOP 10 Finance	Signed SOW; deposit invoice
SOP 06 Onboarding	SOP 11 Reporting; SOP 01 (referrals)	Feedback score; testimonial; referral
SOP 02 Investor acquisition	SOP 03 Fundraising	Investor at "Meeting Completed" requesting the data room
SOP 03 Fundraising	SOP 10 Finance; SOP 04 Product	Funds received; MVP budget released
SOP 07 Partnerships	SOP 04 Product; SOP 09 Compliance	LOI; DPIA trigger
SOP 08 Due diligence	SOP 03, 04, 07	DD memo and conditions
SOP 09 Compliance	All external-facing SOPs	Claims check; policy constraints
SOP 10 Finance	SOP 11 Reporting	Monthly close rows
SOP 11 Reporting	SOP 01–10	Decisions and re-prioritisation

5.2 RACI (R = does, A = accountable, C = consulted, I = informed)

SOP	Founder	VA	Solicitor / attorney	Accountant	Fractional CTO	CSO / clinical adviser	Board	Advisory board

Priorities / Risks / Next actions

Priorities

1. Stand up the outsourced bench that unblocks everything: solicitor, trademark attorney and accountant instructed by Fri 18 Sept 2026; fractional CTO engaged for the prototype audit by Mon 28 Sept; CSO identified by Wed 28 Oct (Day 45), engaged by Thu 12 Nov (Day 60).
2. Run SOP 01 at full weekly quota from Mon 28 Sept (Week 3); first signed engagement by Tue 13 Oct (Day 30); three by Sat 12 Dec (Day 90).
3. Do not start SOP 02 until the five pre-conditions are logged as met; target start Wed 14 Oct (Day 31); the CRM count to quote is 319, not 253.
4. Two advisory-board members signed (obstetrics/midwifery and regulatory/CSO profiles) by Thu 12 Nov; four by Fri 11 Dec.
5. Settle David Agunede's role (\$2.2) by Sun 20 Sept (heads of terms) and Tue 13 Oct (deed) — the org chart cannot be published externally until this is done.

Risks

Risk	Likelihood	Impact	Mitigation
Founder runs nine functions and none well	High	High	Weekly time audit (founder OS \$1); VA trigger measured weekly; SOP quotas are minimums, not aspirations
Hiring ahead of revenue	Medium	High	Every hire in \$3 is trigger-gated; salaries > £60k are a board reserved matter; monthly hiring-trigger check
David Agunede role ambiguity persists past Day 7	Medium	High	Standstill letter Week 1; three role options pre-defined (\$2.2); Day 60 hard stop with clean-room rebuild
Contractor IP leaks (developers engaged by others)	Medium	High	IP clause before any work (SOP 08 step 8); prototype audit before reuse
Pricing-floor confusion between documents (sales doc \$16 vs pricing structure)	Medium	Medium	SOP 05 step 3 names <code>/assets/PRICING_STRUCTURE.md</code> as authoritative; sales doc \$16 to be aligned at next revision
SOPs written but not used	Medium	Medium	Each SOP has a KPI in the Friday review; an SOP with no KPI for two weeks is escalated to the Monday plan (principle 7)
