7. Close: from interest to investment discussion	7
8. Objection handling (investors)	8
9. Compliance for fundraising communications (UK)	9

Companion to `VYTALIX_INVESTOR_CRM.xlsx`, `TOP_25_INVESTORS.md`, `CALL_LISTS.md` and the per-investor scripts in `OUTREACH_TOP25.md`. Pre-conditions before ANY outreach: (1) Vytalix incorporated, (2) MaternaLink IP heads of terms signed, (3) the 2025 clinical-AI claims retired from all materials, (4) one-pager and data-room v1 ready, (5) SEIS/EIS advance assurance submitted (say "applied for", never "approved", until it is).

1. Operating rules

- Phone-first for A-tier with a verified number; email/LinkedIn-first otherwise. Never call personal mobiles. Log every touch in `CRM Status` the same day.
- One personalised reason per message: a named portfolio company, a stated thesis, or a public statement by the partner. No mass messages.
- Truth rule: describe stage as "pre-seed, founder-led, prototype and pilot in design". Never imply NHS, government or clinical validation.
- Cadence: call → same-day email → +4 days follow-up #1 → +10 days follow-up #2 → +21 days follow-up #3 → quarterly update list. Three touches without response = "Future Opportunity", not "Passed".
- Weekly volume target (founder, weeks 5–12): 15 calls, 25 emails, 20 LinkedIn touches, 3 meetings.

2. Phone opening (generic, 25 seconds)

"Good morning, [name], this is [Founder], founder of Vytalix, a UK health-technology group. I'm calling because [Fund] backed [portfolio company] and we're building something in an adjacent space: MaternaLink, a maternal-health coordination platform in development for the UK and Nigeria. I'm not asking for a decision on this call. I'd like 20 minutes with [partner] to test fit against your [stage] mandate. Is [partner] the right person, and what's the best way to get that slot?"

Gatekeeper variant: "Could you tell me who leads health-tech investments and the best route to reach them, an email or a pitch form? I'll keep it to one page."

Voicemail (15 seconds): name, company, one-line reason, "I'll send a one-page summary by email today; my number is [number]."

3. Email (generic skeleton)

Subject: Maternal-health platform (UK + Nigeria), 20 minutes?

1. Who you are, one line.
2. Why them specifically, one line with a named portfolio company or thesis.
3. What exists today, honestly, three bullets.
4. What you're raising and for what, one line.
5. The ask: 20 minutes, one-pager attached. Under 150 words.

4. LinkedIn

Connection note under 300 characters with the specific reason. After acceptance, one message with the one-line pitch and the 20-minute ask. Do not pitch in the connection note beyond one sentence. Comment on the partner's recent post once before messaging if possible.

5. Follow-ups

- #1 (day 4): one-pager link plus one genuine question about their process or thesis.

- #2 (day 10): one new proof point (advisor confirmed, pilot LOI, first paying client, grant submitted). No proof point, no follow-up: create one first.
- #3 (day 21): close the loop; ask for a referral to a better-fit fund; move to quarterly update.

6. Investor meeting structure (30 minutes)

Min	Segment	Content
0–3	Frame	Thank, confirm time, agree agenda, ask what they want to leave with.
3–8	Their mandate	Stage, ticket, process, what they've passed on recently in health-tech and why.
8–12	Problem and why now	UK maternal inequality evidence; Nigeria burden; communication and coordination failures cited in national reviews. Cite sources.
12–17	What exists	Prototype, government conversation status, services revenue (actuals only), team and advisors (real only).
17–22	Product and evidence plan	MaternaLink v1 (non-diagnostic), pilot design, what claims each evidence stage permits, regulatory posture.
22–26	Business model and round	Services fund the company; platform is the equity story; round size, use of funds, milestones.
26–29	Their objection	Ask directly: "What would stop you?" Answer it or commit to a written answer within 48 hours.
29–30	Next step	Agree a concrete next step with a date.

7. Close: from interest to investment discussion

1. Interest signal → send data room (one-pager, deck, financial model summary, IP agreement summary, advisory board, pilot plan, risk register).
2. Second meeting with a partner → present the 90-day milestone plan; ask for their diligence list.
3. Diligence → answer within 48 hours; keep a Q&A log; introduce advisors.
4. Term discussion → SEIS/EIS-compatible instrument (advance subscription agreement or priced round; solicitor to advise); target lead first, then fill.
5. Close → signed docs, funds, Companies House filings, SEIS/EIS compliance statements.

8. Objection handling (investors)

Objection	Response
"Too early."	Agree. Ask what milestones would make it right, book a 90-day update, ask for one intro.
"Solo founder."	Show the advisory board plan and fractional CTO/clinical leads; state the hiring plan tied to the round.
"Government sales in Nigeria are slow and risky."	Agree; Nigeria is a second market; UK services and pilots come first; government revenue is upside, not base case.
"Is this a medical device?"	v1 is designed to stay non-diagnostic with a documented intended-use statement; predictive features only via a validated SaMD pathway.

Objection	Response
"mDoc is already there."	Correct; we differentiate on facility-side coordination and interoperability, and target different states or NGO channels; partnership is an option.
"What do you own?"	The IP agreement (once signed). Until then, do not pitch.
"Why will hospitals pay?"	Pilot-first, evidence-generating, priced to the budget-holder's problem (communication failures, DNA rates, complaints). Show the pricing logic, not a promise.

9. Compliance for fundraising communications (UK)

Investment promotions are regulated. Use only communications that fall within FCA exemptions (e.g., to certified high-net-worth or self-certified sophisticated investors, or via an authorised platform) and get a solicitor to sign off the deck's disclaimers. Never say "guaranteed", "assured" or "low risk". TO VALIDATE with a solicitor before the first send.
