1. Octopus Ventures

PHONE OPENING

"Hello, my name is [Founder], founder of Vytalix, a UK health-technology group building MaternaLink, a maternal-health coordination platform in development for the UK and Nigeria. I'm calling Octopus Ventures because of your work with Vira Health (menopause / older women's health. I'm not asking for a decision today; I'd like 20 minutes with Will Gibbs to test whether this is a fit for your Pre-seed (standard £100k cheque via pre-seed team), Seed, Series A, Series B+ mandate. Is Will Gibbs the right route, and what's the best way to get a slot?"

EMAIL

Subject: Maternal-health platform (UK + Nigeria) — 20 minutes with Octopus Ventures?

Dear Will,

I'm the founder of Vytalix, a UK health-technology group. We're developing MaternaLink, a maternal care-coordination and communication platform for health systems in the UK and Nigeria, alongside an advisory practice that funds our early work.

I'm writing to you specifically because Octopus Ventures backs Vira Health (menopause / older women's health, and because octopus runs a dedicated £100k pre-seed programme plus a health team that has already led rounds in women's-health companies (Vira Health), so it can meet Vytalix at pre-formation stage and follow on.

Where we are, honestly: pre-seed, founder-led, a working prototype, an open conversation with a Nigerian state ministry, and a UK pilot programme in design. We are raising a small SEIS/EIS-eligible pre-seed round to fund the pilot and clinical advisory work [confirm once assured]. Position MaternaLink (in development) as a UK-first maternal care-coordination platform aimed at the MBRRACE-UK Black maternal-outcomes gap, with a clear IP-consolidation and NHS pilot plan before asking for the £100k pre-seed cheque.

Could I have 20 minutes to test the fit against your mandate? I'll send a one-pager ahead of the call.

Kind regards,

[Founder]

2. Ada Ventures

PHONE OPENING

"Hello, my name is [Founder], founder of Vytalix, a UK health-technology group building MaternaLink, a maternal-health coordination platform in development for the UK and Nigeria. I'm calling Ada Ventures because of your work with Multiomic Health (metabolic health). I'm not asking for a decision today; I'd like 20 minutes with Check Warner to test whether this is a fit for your Pre-seed, Seed mandate. Is Check Warner the right route, and what's the best way to get a slot?"

EMAIL

Subject: Maternal-health platform (UK + Nigeria) — 20 minutes with Ada Ventures?

Dear Check,

I'm the founder of Vytalix, a UK health-technology group. We're developing MaternaLink, a maternal care-coordination and communication platform for health systems in the UK and Nigeria, alongside an advisory practice that funds our early work.

I'm writing to you specifically because Ada Ventures backs Multiomic Health (metabolic health), and because ada writes £250k-£1.5m pre-seed cheques through an open portal, has a health theme and an explicit inclusion mandate that aligns with MaternaLink's focus on Black maternal-health disparities.

Where we are, honestly: pre-seed, founder-led, a working prototype, an open conversation with a Nigerian state ministry, and a UK pilot programme in design. We are raising a small SEIS/EIS-eligible pre-seed round to fund the pilot and clinical advisory work [confirm once assured]. Lead with the UK Black maternal-outcomes gap as an equity problem, the founder's lived proximity to it, and a UK-first care-coordination v1 with a costed pilot, keeping Nigeria as a later option value.

Could I have 20 minutes to test the fit against your mandate? I'll send a one-pager ahead of the call.

Kind regards,

[Founder]

3. TLcom Capital

PHONE OPENING

"Hello, my name is [Founder], founder of Vytalix, a UK health-technology group building MaternaLink, a maternal-health coordination platform in development for the UK and Nigeria. I'm calling TLcom Capital because of your work with Ilara Health (health-tech. I'm not asking for a decision today; I'd like 20 minutes with Eloho Oname to test whether this is a fit for your Pre-seed (selective), Seed, Series A mandate. Is Eloho Oname the right route, and what's the best way to get a slot?"

EMAIL

Subject: Maternal-health platform (UK + Nigeria) — 20 minutes with TLcom Capital?

Dear Eloho,

I'm the founder of Vytalix, a UK health-technology group. We're developing MaternaLink, a maternal care-coordination and communication platform for health systems in the UK and Nigeria, alongside an advisory practice that funds our early work.

I'm writing to you specifically because TLcom Capital backs Ilara Health (health-tech, and because a London-registered Africa fund with Lagos and Nairobi offices, a healthcare mandate (Ilara Health) and a Lagos partner explicitly tasked with pre-seed and female-founder deals.

Where we are, honestly: pre-seed, founder-led, a working prototype, an open conversation with a Nigerian state ministry, and a UK pilot programme in design. We are raising a small SEIS/EIS-eligible pre-seed round to fund the pilot and clinical advisory work [confirm once assured]. Approach Eloho Oname's pre-seed track with a maternal-health thesis for Nigeria, emphasising the UK-Nigeria structure and NHS-grade clinical governance as differentiation.

Could I have 20 minutes to test the fit against your mandate? I'll send a one-pager ahead of the call.

Kind regards,

[Founder]

5. AlbionVC

PHONE OPENING

"Hello, my name is [Founder], founder of Vytalix, a UK health-technology group building MaternaLink, a maternal-health coordination platform in development for the UK and Nigeria. I'm calling AlbionVC because of your work with Oviva (virtual weight-management clinic. I'm not asking for a decision today; I'd like 20 minutes with Dr Christoph Ruedig to test whether this is a fit for your Seed, Series A mandate. Is Dr Christoph Ruedig the right route, and what's the best way to get a slot?"

EMAIL

Subject: Maternal-health platform (UK + Nigeria) — 20 minutes with AlbionVC?

Dear Dr,

I'm the founder of Vytalix, a UK health-technology group. We're developing MaternaLink, a maternal care-coordination and communication platform for health systems in the UK and Nigeria, alongside an advisory practice that funds our early work.

I'm writing to you specifically because AlbionVC backs Oviva (virtual weight-management clinic, and because albionVC is one of the few UK VCs with a dedicated healthtech practice, NHS-facing portfolio and a verified office line, making it a realistic seed lead once Vytalix has a UK pilot.

Where we are, honestly: pre-seed, founder-led, a working prototype, an open conversation with a Nigerian state ministry, and a UK pilot programme in design. We are raising a small SEIS/EIS-eligible pre-seed round to fund the pilot and clinical advisory work [confirm once assured]. Use the Harley Street Health District link: propose MaternaLink as a care-coordination pilot for a London maternity pathway with measurable outcome and equity metrics before requesting a seed cheque.

Could I have 20 minutes to test the fit against your mandate? I'll send a one-pager ahead of the call.

Kind regards,

6. Grand Challenges Canada

PHONE OPENING

"Hello, my name is [Founder], founder of Vytalix, a UK health-technology group building MaternaLink, a maternal-health coordination platform in development for the UK and Nigeria. I'm calling Grand Challenges Canada because of your work with Hundreds of maternal/newborn health innovations across Africa and Asia incl. Nigerian digital-health projects. I'm not asking for a decision today; I'd like 20 minutes with Karlee Silver to test whether this is a fit for your Seed (c. CAD 100k–250k grants) to Transition To Scale (up to c. CAD 1m–2m repayable/equity) mandate. Is Karlee Silver the right route, and what's the best way to get a slot?"

EMAIL

Subject: Maternal-health platform (UK + Nigeria) — 20 minutes with Grand Challenges Canada?

Dear Karlee,

I'm the founder of Vytalix, a UK health-technology group. We're developing MaternaLink, a maternal care-coordination and communication platform for health systems in the UK and Nigeria, alongside an advisory practice that funds our early work.

I'm writing to you specifically because Grand Challenges Canada backs Hundreds of maternal/newborn health innovations across Africa and Asia incl. Nigerian digital-health projects, and because grand Challenges Canada is one of the few funders whose core mandate is literally maternal and newborn health innovation in countries like Nigeria, with seed cheques sized for a pre-seed company.

Where we are, honestly: pre-seed, founder-led, a working prototype, an open conversation with a Nigerian state ministry, and a UK pilot programme in design. We are raising a small SEIS/EIS-eligible pre-seed round to fund the pilot and clinical advisory work [confirm once assured]. Apply with a Nigerian clinical or state partner for a seed grant testing maternal care-coordination in a state without an incumbent programme, positioning the AI risk-score as a later research track.

Could I have 20 minutes to test the fit against your mandate? I'll send a one-pager ahead of the call.

Kind regards,

8. Nina Capital

PHONE OPENING

"Hello, my name is [Founder], founder of Vytalix, a UK health-technology group building MaternaLink, a maternal-health coordination platform in development for the UK and Nigeria. I'm calling Nina Capital because of your work with 30+ health-tech companies including several UK-headquartered ones (see <https://www.nina.capital/companies> – names TO VALIDATE). I'm not asking for a decision today; I'd like 20 minutes with Marta G. Zanchi to test whether this is a fit for your Pre-seed and seed (first cheque), follow-on to Series A mandate. Is Marta G. Zanchi the right route, and what's the best way to get a slot?"

EMAIL

Subject: Maternal-health platform (UK + Nigeria) — 20 minutes with Nina Capital?

Dear Marta,

I'm the founder of Vytalix, a UK health-technology group. We're developing MaternaLink, a maternal care-coordination and communication platform for health systems in the UK and Nigeria, alongside an advisory practice that funds our early work.

I'm writing to you specifically because Nina Capital backs 30+ health-tech companies including several UK-headquartered ones (see <https://www.nina.capital/companies> – names TO VALIDATE), and because nina is a pure-play pre-seed health-tech investor that backs UK companies, making it one of the few EU funds that could lead Vytalix's first round.

Where we are, honestly: pre-seed, founder-led, a working prototype, an open conversation with a Nigerian state ministry, and a UK pilot programme in design. We are raising a small SEIS/EIS-eligible pre-seed round to fund the

pilot and clinical advisory work [confirm once assured]. Use Nina's needs-led framework: present the maternal-care-coordination unmet need with MBRRACE-UK evidence and a defined first NHS trust pilot.

Could I have 20 minutes to test the fit against your mandate? I'll send a one-pager ahead of the call.

Kind regards,

[Founder]

9. GC Angels

PHONE OPENING

"Hello, my name is [Founder], founder of Vytalix, a UK health-technology group building MaternaLink, a maternal-health coordination platform in development for the UK and Nigeria. I'm calling GC Angels because of your work with North West early-stage companies (TO VALIDATE on official site). I'm not asking for a decision today; I'd like 20 minutes with the investment team to test whether this is a fit for your Pre-seed, Seed and early Series A mandate. Is the investment team the right route, and what's the best way to get a slot?"

EMAIL

Subject: Maternal-health platform (UK + Nigeria) — 20 minutes with GC Angels?

Dear there,

I'm the founder of Vytalix, a UK health-technology group. We're developing MaternaLink, a maternal care-coordination and communication platform for health systems in the UK and Nigeria, alongside an advisory practice that funds our early work.

I'm writing to you specifically because GC Angels backs North West early-stage companies (TO VALIDATE on official site), and because gC Angels writes small direct cheques alongside angels into pre-seed North West companies and sits inside Greater Manchester's devolved health system, a natural pilot environment for a maternity care-coordination platform.

Where we are, honestly: pre-seed, founder-led, a working prototype, an open conversation with a Nigerian state ministry, and a UK pilot programme in design. We are raising a small SEIS/EIS-eligible pre-seed round to fund the pilot and clinical advisory work [confirm once assured]. Frame Vytalix as a Manchester-based maternal-health platform and advisory business seeking SEIS co-investment, with Health Innovation Manchester as the target UK validation partner.

Could I have 20 minutes to test the fit against your mandate? I'll send a one-pager ahead of the call.

Kind regards,

[Founder]

I'm not asking for a decision today; I'd like 20 minutes with Julia Hawkins to test whether this is a fit for your Pre-seed, Seed (Series A via Latitude) mandate. Is Julia Hawkins the right route, and what's the best way to get a slot?"

EMAIL

Subject: Maternal-health platform (UK + Nigeria) — 20 minutes with LocalGlobe (Phoenix Court)?

Dear Julia,

I'm the founder of Vytalix, a UK health-technology group. We're developing MaternaLink, a maternal care-coordination and communication platform for health systems in the UK and Nigeria, alongside an advisory practice that funds our early work.

I'm writing to you specifically because LocalGlobe (Phoenix Court) backs Apian (healthcare drone logistics API), and because localGlobe seeds UK founders at pre-seed, has a health-tech partner and NHS-facing portfolio (Echo, Apian), and its Phoenix Court community lens fits a mission-led maternal-health company.

Where we are, honestly: pre-seed, founder-led, a working prototype, an open conversation with a Nigerian state ministry, and a UK pilot programme in design. We are raising a small SEIS/EIS-eligible pre-seed round to fund the pilot and clinical advisory work [confirm once assured]. Use the health-tech white paper's language: show MaternaLink as NHS-workflow-native care coordination with a named NHS trust pilot pathway, and resolve the IP question before first contact.

Could I have 20 minutes to test the fit against your mandate? I'll send a one-pager ahead of the call.

Kind regards,

[Founder]

I'm not asking for a decision today; I'd like 20 minutes with the investment team to test whether this is a fit for your Pre-seed and Seed mandate. Is the investment team the right route, and what's the best way to get a slot?"

Subject: Maternal-health platform (UK + Nigeria) — 20 minutes with Angel Academe?

Dear there,

I'm the founder of Vytalix, a UK health-technology group. We're developing MaternaLink, a maternal care-coordination and communication platform for health systems in the UK and Nigeria, alongside an advisory practice that funds our early work.

I'm writing to you specifically because Angel Academe backs Bea Fertility (women's health), and because angel Academe is a fee-free UK pre-seed network that already backs women's-health companies like Bea Fertility, so a maternal-health platform fits its investors' interests directly.

Where we are, honestly: pre-seed, founder-led, a working prototype, an open conversation with a Nigerian state ministry, and a UK pilot programme in design. We are raising a small SEIS/EIS-eligible pre-seed round to fund the pilot and clinical advisory work [confirm once assured]. If a woman co-founder or clinical co-founder joins, apply via the founders form positioning MaternaLink (in development) as a UK maternal care-coordination platform led by an inclusive team.

Could I have 20 minutes to test the fit against your mandate? I'll send a one-pager ahead of the call.

Kind regards,

[Founder]

Connection note (≤300 chars): "Hi there, founder of Vytalix here (UK health-tech; maternal-health platform in development for UK + Nigeria). Following Angel Academe's work with Bea Fertility (women's health). Would value connecting."

Message after connection: "Thanks for connecting, there. Quick context: we're pre-seed, building MaternaLink with a services arm funding the early work. If a woman co-founder or clinical co-founder joins, apply via the founders form positioning MaternaLink (in development) as a UK maternal care-coordination plat Open to a 20-minute call in the next two weeks? Happy to send a one-pager first."

FOLLOW-UP #1 (day 4): "Sharing the one-pager as promised [link]. The specific question I'd like your view on: Angel Academe requires at least one woman founder on the cap table, and Vytalix's founding team composition is currently undocumented. — I'd rather hear it early."

FOLLOW-UP #2 (day 10): "One update since I wrote: [milestone, e.g., advisory board member confirmed / pilot LOI]. If timing is wrong, could you point me to the right person at Angel Academe or a fund you'd suggest?"

FOLLOW-UP #3 (day 21): "Closing the loop. I'll add you to our quarterly investor update unless you'd prefer not; next update covers pilot progress and the first revenue quarter. Thanks for your time."

MEETING (20–30 min): 1) Their mandate and process (5) · 2) Problem and why now (3) · 3) What exists today, no inflation (4) · 4) MaternaLink v1 and evidence plan (5) · 5) Business model: services + platform (3) · 6) Round, use of funds, milestones (3) · 7) Their objection: 'Angel Academe requires at least one woman founder on the cap table, and Vytalix's founding team comp' answered directly (3) · 8) Agree next step (2).

CLOSE: Ask: "Based on what you've seen, is this within mandate? If yes, what would you need to see to lead or co-invest at pre-seed, and by when?" Convert to: data-room access → second call with a partner → term discussion. Log stage in CRM.

25. UCL Technology Fund

PHONE OPENING

"Hello, my name is [Founder], founder of Vytalix, a UK health-technology group building MaternaLink, a maternal-health coordination platform in development for the UK and Nigeria. I'm calling UCL Technology Fund because of your work with UCL health spin-outs (TO VALIDATE on official portfolio). I'm not asking for a decision today; I'd like 20 minutes with the investment team to test whether this is a fit for your Pre-seed, Seed and Series A mandate. Is the investment team the right route, and what's the best way to get a slot?"

Subject: Maternal-health platform (UK + Nigeria) — 20 minutes with UCL Technology Fund?

Dear there,

I'm the founder of Vytalix, a UK health-technology group. We're developing MaternaLink, a maternal care-coordination and communication platform for health systems in the UK and Nigeria, alongside an advisory practice that funds our early work.

I'm writing to you specifically because UCL Technology Fund backs UCL health spin-outs (TO VALIDATE on official portfolio), and because uCLTF sits next to UCL's Institute for Women's Health and UCLH, so a MaternaLink research collaboration with UCL could unlock both clinical validation and a natural seed investor.

Where we are, honestly: pre-seed, founder-led, a working prototype, an open conversation with a Nigerian state ministry, and a UK pilot programme in design. We are raising a small SEIS/EIS-eligible pre-seed round to fund the pilot and clinical advisory work [confirm once assured]. Pursue a research partnership with a UCL maternal-health group first; only then present MaternaLink's v3 AI risk-stratification track as UCL-linked IP eligible for UCLTF.

Could I have 20 minutes to test the fit against your mandate? I'll send a one-pager ahead of the call.

Kind regards,

[Founder]
